Nhugu dāyā Bhintunā (Greetings on the occasion of the New Year!). Because many of us live far from home, it is even more important to give the traditional New Year Nepal Sambat greeting to friends and family. But why do we wish you a Nepal Sambat? Since the New Year celebration falls during the three days of the Swonti festival (Tihar in Nepali), many people consider this day to mark the Newari Sambat. This misconception occurs because usually only Newars celebrate at this time, and the New Year traditions have not been broadcast to other Nepalese communities by the mass media. Yet, as detailed in the previous issue of the journal, for historical reasons Nepal Sambat ought to be the name used to designate this calendar cycle.

After three issues, the journal has gained recognition not only in the eyes of Newars living in both the United States and other parts of the globe, but also from Newar scholars and researchers. While the journal is concerned with putting forth high quality academic articles, its main goal has always been to inform the Newar community about our own cultural heritage. Towards these ends, the journal has provided information on Newar Studies from all around the world. Yet we need our readers to keep us abreast of Newar activities that take place in your own communities; your help is invaluable.

As always, the journal is multi-lingual. Along with our regular column of research abstracts and other pertinent information, the English-language section includes three articles. First, Professor Bruce Owen describes how he became involved in Newar Studies on both a personal and an academic level. Second, Daya R. Shākya details the extent to which Newars have given up speaking their native language. Third, Malla K. Sunder asks the crucial question of whether or not Newars ought to consider themselves janajāti. The Nepali-language section also includes three articles. First, Mr. Lilābhakta Munakarmi describes his historical findings on Bhaktapur's Malla Royal Palace. Second, Dr. Tulsi Maharjan writes why it is crucial for Newars to maintain their identity. The last article is about installation of Shankadhar Sakhwa's statue. The Nepal Bhasha-language section consists of four pieces contributed by Newar writers. First is a poem by Labha Ratna Tuladhar. Second, Premhira Tuladhar pens her findings on contribution made by Chittadhar 'Hridaya' in Nepal Bhasha literature. Third, Shashikala Manadhar writes her remembrance about Chittadhar. The fourth one is a contemporary thoughts of dilemma on Newars by Labha Ratna Tuladhar. Besides these, an extensive interview with the sacred Buddhist dancer, Master Prajwal Ratna Vajracharya also included.

We cannot give enough thanks to the contributors, editors, and other individuals and publications that have made this journal such a success. Without their help, the journal would not be possible. Himalayan Research Bulletin, The Sandhya Times, Kathmandu Post, Nepal Bhasha Manka Khalah Bulletin, Newah Annual, and Premier Dance and Entertainment all have provided invaluable information on Newar Studies. Tribhuvan Tuladhar, Swami Chetanānanda, Kashinath Tamot, Min Bahadur Shākya, Prajwal Vajrācharya, Paula Huston, Bhima Shākya, Suva Shākya, Sudip Shākya have all worked together so as to bring this issue to fruition. We would also like to thank Gregory Grieve for his assistance with the English-language section of the journal.

Call For Papers

Newāḥ Vijñāna (the Journal of Newar Studies) accepts contributions for its fifth issue, which will debut in November 2002. The Journal's aim is to consolidate empirical, theoretical, as well as any work done in Newar language, culture, art, history, customs, traditions, religion, biography, music, architecture and the information on Newars around the world so as to serve as a tool to preserve and expose the richness of Newar heritage.

Submissions (articles, abstracts of recently completed dissertations, and reviews of any work on Newars, translations of Newar literary works, notes on any work/ projects on Newars) are invited in English, Nepali and Nepal Bhasha. A hard copy and an IBM-compatible, preferably Microsoft Word, file on disk are required. The editors reserve the right not to process submissions that do not serve the goals of the journal.

The last date for submissions is September 30th, 2002

**Personal Theory:
Towards a satisfactory explanation for why I study
Newar culture; or, Dyaḥ Waẽ ("God Crazy")**

Bruce McCoy Owens
Dept. of Sociology and Anthropology
Wheaton College

One of the things that I find most difficult about doing research is fully explaining to those about whom I am trying to learn why it is that I am doing what I am doing. I have always felt that it is essential to offer an account for my interests, and always do so, but even if the explanation I offer is satisfactory to those with whom I am speaking, it is rarely satisfactory to myself. There are several reasons for this. One is that it is very likely that Newars who ask about and are in various ways involved in my research are not going to be interested in details of my own project that I find quite fascinating. In this they are no different from the vast majority of people in the United States who are not involved in my specific field of research. In fact I am more likely to succeed in sustaining the interest of a casual acquaintance in the Kathmandu Valley in my projects than I am the interest of a fellow American, no matter what their respective levels of education might be.

Another is that the kinds of questions that motivate me are often quite different from the kinds of questions that are most important to them. For example, I have been conducting research on the topic the deity Bungadyaḥ¹ for nearly two decades now, and the questions that Newars most frequently ask upon learning of this study are "How old is Bungadyaḥ's chariot festival?" and "Is Bungadyaḥ male or female?" These are both interesting questions, but what makes them particularly interesting to me is

different, I believe, from what makes them interesting to those who ask them. For example, after many conversations about the topic, I am convinced that the age of the chariot festival is interesting to most Newars for three major reasons: first, age is a highly valued attribute of both images and ritual practices; second, its great antiquity firmly establishes the Newar origins of this now national festival, and third, residents of Patan want to confirm that their chariot festival is more ancient than its Kathmandu counterpart (and vice versa). What most interests me about this question is its implications for determining the cultural and political context of the festival's origins. The question about the deity's sexuality is more of a trick question to see whether I am aware of the various issues involved in answering it, but is critical to me due to my interest in issues of identity.

The most vexing of the reasons that I find my own explanations for my research unsatisfying is the sense I often get that, to the extent that my interests in studying Newar culture are motivated by relatively abstract and apparently arcane theoretical interests, it appears to my Newar interlocutors that my interest in studying them and their culture is diminished, superficial, ulterior, or otherwise less personal, less "real." In other words, the more I try to explain fully my interest in Newars, the less interested I appear to be.

This essay is an attempt to rectify this situation. Newah Vijñana is perhaps the only journal whose regular readership includes those who can appreciate this problem from either or both sides of the equation, and I hope that my attempt to solve it here will provoke its readers (especially Newars) to respond to my efforts. Two years ago, the editor of Newah Vijñana asked scholars who were engaged in Newar studies how they learned about Newars as a possible field of study, what they found distinctive about Newars, and what areas of research about Newars they felt remained to be done. This essay only touches on these questions (mostly the first), and an adequate response to them (especially the third) would require another essay. What I want to do here is demonstrate that the kinds of interests that anthropologists call "theoretical" that can seem far removed from the immediate situation of fieldwork and the personal experiences one has while doing it, can in fact be highly personal and deeply motivated as well. Far from distancing the anthropologist from personal engagement with the place and people he or she studies, theoretical interests can contribute to that engagement and make it deeper, and the theoretical issues I pursue are often shaped if not posed by the people among whom I work in what anthropologists call "the field." My approach is necessarily personal, for the personal is basically what's at issue here.

Anthropologists have recently spilt a great deal of ink over the issues of how it is that they go about doing their work, and the nature of their relationships with those among whom they do it. Reading about the work of anthropologists who have done research in the Philippines, Helambu, and Naples, for example², helps me to contemplate my own situation in the Kathmandu valley, and re-enforces my sense that it is important to carefully consider the

ways in which my own interests are perceived by those whose hospitality I enjoy, and who are patient enough to answer my endless questions. One could describe the ways in which these issues are raised in theoretical terms that seem quite abstract and quite distant from personal experience and genuine personal involvement. For example, the problem of understanding how what one learns is affected by the situation in which one is learning it is often thought of as a "postmodern" problem related to a rejection of a Cartesian notion of knowledge being obtainable from an absolutely objective point outside the phenomenon about which one wishes to learn. To put this more simply, who you are, who you know, how you know, and when you learned it have everything to do with what you know. From a postmodernist perspective, all knowledge is influenced by the circumstances of its acquisition, and is thus a product of particular historical, cultural, and political processes.

As I will explain, this problem, at one level highly abstract, is one of the things that motivated me to spend twenty years thinking about Bungadyah and seeing six of his festivals, once flying back and forth twice in a month while teaching in Chicago in order to see as much as I could of the twelve year procession. Several of those who knew me while I was most intensively studying Bungadyah as part of my dissertation research described me as *dyah waē* (god crazy), such was the intensity of my fascination. Both my interest in Bungadyah and my interest in writing this article are motivated and informed by theoretical problems. But my objective here is to demonstrate to those interested in the fruits of my conversations with my Newar interlocutors that there is no real contradiction, at least for me, between theoretical and personal interests, and that my theoretical interests often emerge

from concrete personal experiences that I have while engaged in my research. I hope this article will at once exemplify and explain how this can be so.

The only way that I can imagine developing a convincing argument about the personal nature of theoretical interests is to, as I warned above, offer a personal account of how my interests came to be what they are, and how they led me to learn about Newar culture, and how Newars and Newar culture, in turn, shaped my theoretical concerns. I do not imagine that my intellectual trajectory is intrinsically fascinating, but it is the trajectory with which I am most familiar, and I think it can serve as an example that will help make this article not only a claim about myself, but a more general argument about the link between the personal and the theoretical. This is part of what I mean when I say that I hope that this article will exemplify as well as explain my point of view. In offering a personal account, I am also presenting a kind of theoretical argument.

In order to do my research it is critical that I understand why people do what they do. This kind of understanding can only come with a personal knowledge of the ways in which the things they do (such as build a chariot for a god) fit into the rest of their lives. It strikes me as only reasonable that a satisfactory explanation of why I do what I do (such as watch people build chariots for gods) would include the *same* sort of information. In providing this kind of explanation I hope to demonstrate that my theoretical interests are personally motivated products of a multitude of life experiences, including my experiences in Nepal with those from whom I have learned. Given the kind of engagement that effective participant observation research requires, and knowing a large number of anthropologists who do this kind of work, I argue that this link between the theoretic-

cal and the personal is more the rule than the exception among socio-cultural anthropologists.³ The broad anthropological project of understanding what it is to be human requires intimate engagement with people that is both personally and theoretically motivated.

I can put off the inevitable problem of defining my terms no longer. What do I mean by theory and theoretical, and what do I mean by personal? Theory is a term that is often used in popular speech in a negative way, as in "that may be true in *theory*, but we know what *really* goes on," suggesting that theory and reality are fundamentally opposed, theory being, in this sense, a kind of failed speculation about reality that reality itself tends to undermine. This is related in a way to another typical use that contrasts theory with *practice*. This second use does not necessarily cast theory in a negative light, but offers the possibility of "putting theory into practice." In this sense, theory consists of ideas about practice that might even *help* in practical matters. Raymond Williams, to whom anthropologists frequently turn when trying to be rigorous about their language, suggests that this distinction between theory and practice is prevalent in the ways that most social theorists use the term, and that theory can be considered to be "a scheme of ideas which explains practice." This leads him to make another important distinction between theory and law that is important for our purposes, the latter being, as it were, an ex-theory to which no objection can be made.⁴ Hence, we have the *theory* of relativity and the law of gravity. In the study of human behavior, it is almost never the case that no objection could be made to a scheme of ideas intended to explain a particular practice, because it is impossible to control for all the conditions that might play a role in its taking place. We are, after all, dealing with humans, who are unlikely to concede to test-

tube like constraints on their lives. Even if they were, it wouldn't solve the problem, because we would hardly learn about "normal" human practices in the strange settings of human laboratories. So in sociocultural anthropology theories never become laws because our subjects of study (and we) are human. What good are anthropological theories then?

To put it simply, anthropological theory (just like any theory) helps us to understand particular circumstances in general terms. One of the hallmarks of anthropology is its tendency to make cross-cultural comparisons. These comparisons are made not only to point out important distinctions, but also to understand those distinctions as products or evidence of broader commonalities. For example, research on other caste societies helps us to formulate questions that we need to ask in order to better understand the particularities of Newar caste society. The research on Newar society then helps us to refine our concept of caste, such that it can be better applied in work on all societies whose members think about one another in these terms. Our "scheme of ideas" explaining practices in caste societies can then be used to better refine our more general ideas about social hierarchy, or power, for example, and so on. This is simply an anthropological example of the relationship between inductive and deductive reasoning. So theory is always a sort of two-way street. It can take the researcher "away" from a particular place or people in that it relies on abstraction and cross-cultural comparison for development and testing, but it also prepares the researcher to ask the kinds of questions that can reveal a particular place or people to be unique in concrete ways.

For some critics of the anthropological way of doing things, the problem lies in the testing of theories, and the fact that they never become laws. Anthropologists generally use a method

of research in which they inevitably become a part of what they are researching in important ways. This method, called participant observation, is, from one point of view, impossible, because it is impossible to do both at the same moment in time, and because participation inevitably involves altering what would have otherwise happened had the anthropologist not been there to participate. Most anthropologists working today acknowledge this, but rather than bemoan the logical impossibility of their method and their "lack of objectivity," they take great pains to describe the nature of their involvement with whomever and whatever they are studying. Many even argue that the detailed knowledge and empathy they develop through their personal experiences and relationships are absolutely crucial to deepening their understanding.

This brings us to the second term in need of defining: personal. It is actually a complicated term because it is in some ways a paradoxical concept. This paradox is evident in its origins, as it derives from the Latin term for the mask worn by an actor, *persona*. *Persona* in its original sense is both a means of revealing the identity of the character being played and concealing the identity of the player. In current use, when someone declares that their reason for doing something is "personal," they are often at once stating that the full explanation for their actions is highly individual and "private," and at the same time letting it be known that there is some secret that is the key to explaining their behavior. To label reasons for one's actions "personal" is also to signal that they are particularly compelling; to do so not only shields one's motives from scrutiny but marks one's actions as somehow personally unavoidable. As this is an essay intended for publication, I am obviously not using the term

"personal" in a secretive sense, but rather in its individual sense, and in the sense that personal motives are particularly motivating in the way that "personal convictions" are ideas to which one has particularly strong attachments. What then, is the personal path through which I came to be interested in Newar culture, and how is this related to the theoretical questions that motivate my research?

As a means of further explicating what I mean by *personal* and paying tribute to the teacher who first introduced me to anthropology, I will begin the tale of how I came to be *dyah waē* ("god crazy") with my social studies teacher in ninth grade, which is to say at the age of fourteen. Mrs. Atamian taught "World Civilization" and had the most all-encompassing and, in retrospect, revolutionary concept of civilization I have yet encountered, for it included Australopithecines and other early hominids that are not generally associated with writing, state societies, dense populations and other conventional markers of the "civilized." It was only in my senior year while contemplating where I wanted to go to college that I questioned the wisdom of what seemed to be the inevitable trajectory of studying biology or some other "hard" science, and thought back to what it was that I enjoyed studying most for its own sake rather than for the purpose of garnering a credential or preparing to learn something *else*. Mrs. Atamian's Australopithecines immediately came to mind, for I had devoted countless completely unnecessary hours (in terms of their impact on my grade) reading about them and other early hominids. In retrospect, I am not sure how to account for this fascination, though I suspect it had to do with the fundamental problem of determining the ways in which humans differ from other animals, a problem that was becoming more vexing the fuzzier the distinction became as my

knowledge of human history grew. For the first time, anthropology seemed like an entirely logical, if utterly impractical choice of discipline to pursue. My reasons for pursuing anthropology were from the outset highly personal in the sense that they reflected my individual inclinations (rather than my environment, in which sciences like chemistry and biology dominated in any number of ways) and they were uniquely compelling.

No account of my present interests would be complete without mention of another teacher whose influence met with my inclinations in a particularly powerful way: Rafe Jenanyan, my French teacher in my last two years of high school. Seven previous years of conjugating French verbs and otherwise wringing the life out of a beautiful language made it unlikely that a teacher of French could have such a powerful influence at that point in my career. Rafe somehow located this language in French culture in a vital way, and gave me a glimpse of the possibilities of experiencing another culture as a speaker of its language. My appetite for cultural alterity had already been whetted by the extraordinary packages of wondrous things that my Aunt Ruth would send at Christmas from Turkey, Mexico, Germany, or wherever the Air Force stationed her. It is thus testimony to my aunt's creative generosity, my parents' love of Europe, and Rafe's extraordinary teaching abilities and friendship (not to speak of the war in Vietnam) that my first choice of location for my higher education was Paris and my second Montréal. Parental guidance led me across the St. Lawrence rather than the Atlantic, and to McGill University rather than La Sorbonne.

McGill University accommodated my interests in biology and anthropology, and I pursued both until I discovered what sort of students I would be compelled to study with were I to continue in biology. For the most part

they were studying biology in order to become doctors: prestigious members of the upper echelons of society. They were single-minded in their dedication to their studies, but their motivation for studying didn't seem to lie in the material they worked so hard to absorb, and, with several notable exceptions, they weren't particularly interesting to talk to. Most anthropology students, on the other hand, seemed to be fascinated with what they were learning. Many were (like myself) disenchanted with the society in which they lived, and hoped through anthropology to learn of other human possibilities. They were also refreshingly unruly, had a tendency to question professors, and in many instances aspired to be effectively subversive either in transforming their own society or in mitigating the effects of their society's colonialism, imperialism, or economic domination upon others. These were all topics of central concern in Québec in particular and Canada in general, which Pierre Vallières had recently described as a victim of cocacolonization.⁵ Anthropology professors also seldom held classes at eight in the morning. So anthropology it was to be.

Montréal in the early seventies proved to be fascinating in ways that no one could have predicted for an anthropologist in the making. McGill was a place that attracted foreign students from all over the world, and I soon found myself with many Latin American friends who began to convince me that the United States was not, in fact, the center of the world. After first resisting this heretical notion, I came to embrace it with relief. I became a Latin Americanist partly because of my desire to better understand my often perplexing new friends, in part because these same friends served as convenient cultural informants, and in part because of the problems Latin Americans faced as a result of American foreign policy.

Though the war in Vietnam had made American foreign policy a matter of central concern for me and most of my friends, living in Québec provided another, more nuanced perspective from which to observe the less spectacular atrocities committed by our government on a day-to-day basis.

Québec's declaration of martial law in response to the Front de Libération Québec's kidnapping of a Québec Minister and a British diplomat in my first year brought into startling relief another kind of struggle that was not only about inequity and power, but also about cultural identity and language. As one deprived of my civil rights and, according to new standards, legally incarcerable for a period of up to seven months without trial by virtue of utterly innocuous actions such as listening to FLQ speakers and knowing FLQ members, my understanding of the potentially arbitrary nature of state power became personalized in new ways. It was through one of my Latin American friends that I became aware that the experience of seeing such manifestations of power could be utterly different, even for people of similar political persuasions. One morning as my friend Javier and I were walking down University Street from our dormitory perched on Mount Royal, we saw a half-tread military vehicle with a manned 50mm machine gun roar past. I was stunned, and certain that this was the harbinger of a violent revolutionary reaction on the part of "the people." Javier, on the other hand, smiled with nostalgic recognition, and expressed his delight at seeing this reminder of his hometown, Bogota. My understanding of the ways in which power was located, deployed, and experienced clearly required serious reconsideration, and the politics of identity and language demanded my attention. Québec and my fellow students at McGill effectively de-centered my world in

radical ways.

Another motivation for my studying in Montréal was my love for cities. As a child of the suburbs who headed into Cambridge and Boston at every opportunity, the prospect of actually living in a city was exciting. Montréal fed my appetite for cultural diversity in a way few other cities in North America could, for this was no melting pot, but a smorgasbord in which third generation immigrants still spoke their native languages at home, and in which one could walk for blocks hearing as much Portuguese, Polish, Hungarian, and Yiddish as French or English. Peter C.W. Gutkind, the famous Africanist and urban anthropologist introduced me to the new field of urban anthropology, and raised the prospect for me of actually doing research in the kinds of places I already loved, and getting in at the ground level in a relatively new anthropological enterprise while doing so. Urban anthropology challenged many of what were anthropology's comfortable conventions at the time, such as how one defined a "community" or "society" and how one pursued a "holistic" approach to studying a place that a million people called home. It also forced anthropologists to cope with levels of diversity and rates of change among their subjects that could not be as easily ignored as in studies of the rural places that were most commonly the subjects of their research. Living in Montréal and trying to think about it in anthropological terms made it exciting and imperative to rethink certain anthropological conventions and methodologies: problems with which I continue to grapple.

A course on the sociology of knowledge, which examined knowledge as a product of social construction⁶ raised questions (very much in the air at the time) about how features of contemporary society, particularly mass-media and the marketplace, might have implications

for the ways in which we experience and define reality. These interests, which were in retrospect highly postmodern (but certainly not original), prompted me to wonder about the cultural impact upon perception itself. One of the areas of perception that anthropologists had begun to explore in some depth was the perception of space, in the new field called proxemics.⁷ The experimental housing project called Habitat '67, designed by Moshe Safdie and built on a small island in the St. Lawrence for Expo '67, provided me with an ideal place in which to combine my interests in urban settings and perception. It was one of my first research sites. Contrary to my expectations, most inhabitants in this radically modern development made of concrete were rather well to do, and I found myself engaged in what was later to be called "studying up," that is, conducting research among those most empowered by wealth in society rather than focusing primarily on the disadvantaged, as anthropologists had traditionally done. While sipping good scotch in the living rooms of chief executives and prominent musicians in the course of conducting interviews, it occurred to me that this was a segment of society that must be better understood if one was ever to understand another rather important dimension of social diversity and conflict: class. The striking socio-cultural diversity of Montréal and my first forays into anthropological research there surely conspired to persuade me that somehow anthropology should find a way to consider the diverse perspectives found in any society without abandoning fine-grained "thick" descriptive ethnography.⁸

My first course in anthropological theory was stunningly boring: a history of ideas divorced from the motivating circumstances through which they were created. One highlight of the course, however, was a guest lecturer in

the person of Bernard Arcand, a recent graduate of Cambridge University who had worked with Edmund Leach, Britain's most outspoken advocate of France's Lévi-Straussian structuralism. His lecture introduced me to an entirely different way of thinking about space. It was a demonstration of structuralist principles of analysis that used as its subject matter the way Cuiva of Amazonian Colombia conceived the world in which they lived. I found my way into one of Professor Arcand's classes, and read much more of Lévi-Strauss, who argued that Native American myths recorded from the Northwest coast to Tierra del Fuego could be understood as various elaborations on common themes that were built upon shared structural principles. Myths that were, on the surface, about jaguars and fabulous creatures that could change form and bring light or darkness to the world, were, at a deeper level, intellectual attempts to resolve contradictions that people face in day-to-day life. The key to understanding the important (and concealed) meanings of these myths was to discover the ways in which they were structured: how different parts of the story and different characters in it were related in structural, and very often oppositional terms. The best way for getting at the structural "bones" of any particular myth was to analyze several different versions, for comparison among them would reveal the critical "relations between relations" that carried their ultimate meaning.⁹ Here Lévi-Strauss was working out a way to understand variation in human culture in terms of human commonality, and doing so by considering the very structure of human thought. This held great appeal for someone interested in cultural diversity and perception.

One problem with this work was that I could never predict how Lévi-Strauss would analyze a particular myth. I could see general regularities in the analytic method, but when it

came to using it, it seemed that some interpretations were little more than products of Lévi-Strauss's virtuosic cleverness. In a sense, Lévi-Strauss expressed an awareness of this problem when he said that his own analyses were "myths of myths": other versions of the myths themselves, but this did not satisfy my desire for analytic rigor. This dissatisfaction led me to try to relate work on the psychology of perception (which I presumed was based on sound, verifiable, scientific technique), to Lévi-Strauss's ideas about human thought. Unfortunately, the psychology of perception could not explain the kinds of structural regularities revealed in structuralist analyses, and the bridge that I had hoped to build between these two fields turned out to be two paper pylons with only loose strands of conjecture tying them together. My desire to better understand a rarified realm of thought, such as myth, in relation to more mundane aspects of human existence did not die with this effort, however.

After graduating from college, working, and traveling a bit in Mexico, I applied to graduate school and left for Asia. The trip was to be a kind of acid test of my decision to pursue anthropology. South Asia was the perfect destination, as I knew virtually nothing about it, didn't speak anything like any of the relevant languages, and was sure to experience profound culture shock. I had absolutely no intention of pursuing any formal studies on the region, for I felt that it had far too much history, far too many languages, and far too much diversity for anyone to manage. In other words, it was going to be, I was sure, far too much of a good thing. I would use my travels as a test to see if anthropology was for me, but I would actually pursue it in Latin America, as I was, after all, a Latin Americanist. Nepal put an end to all such practicality.

I can still recall vividly the moment I first

stepped into Kathmandu's Darbar square. It was after a long bus ride from Birganj and some of the worst food I had ever eaten the night before, both of which, I am sure, contributed to the glory of the moment. To put it simply, I was stunned. It was my first taste of what I would discover to be a wondrous amalgam of extraordinary architecture and an intensely social urban life, and the effects of cocacolonialization were scarcely in evidence at this first encounter. It is commonplace to the point of cliché to say it, but I, like many others, became struck by the ways in which religion seemed to be a part of the texture of everything, from human interaction, to buildings, to the flow of traffic. Divisions between the sacred and profane that I would expect to find were simply not there, and others that I did not anticipate would surprise me, usually making themselves known by some transgression on my part. The extraordinary thing about religion was that, in many ways, there was nothing extraordinary about it. But, of course, in its details, it was utterly extraordinary.

My determination to experience Nepal unfettered by preconceptions or touristic programs was overcome by a small boy in Mangal Bazār, who, along with the usual pitch for showing me the Māhābuddha temple, "golden temple," and so on, asked, "Do you want to see festival?" This child's fateful intervention led me to research that has occupied me for nearly two decades. The festival in question was the chariot procession of Bungadyaḥ. The chariot was stuck in what I now know to be Thaine, on a road that was then dirt. The obvious question, why hundreds of people would pull a chariot over sixty feet high and weighing several tons through the narrow streets of Patan is one that occupies me still.

While in Nepal, I received word that the graduate program in anthropology at Columbia

University had accepted me as a doctoral student. In my first semester there, I took a course on the anthropology of art with Professor Alexander Alland, which gave me an excuse to further explore the festival I had seen in Nepal, as it was a kind of performative art that involved artistic creativity. Writing about this topic at this time with this professor was to prove highly fortuitous. Father John Locke's work on the chariot festival had just been acquired by the library of the School for International Affairs, and though Locke modestly described it as based on limited secondary sources and "a bare minimum of rather hurried original research,"¹⁰ it was a gold-mine of information from my perspective and made my project of considering the symbolic meanings of Bungadya's chariot feasible. Remarkably, Dor Bahadur Bista happened to be a visiting scholar at the Southern Asian Institute that year, and graciously allowed me to interview him as a locally available "native informant," the beginning of a long friendship, in spite of his misgivings about my interest in Newar culture - an interest that he felt perpetuated ethnic distinctions that were impediments, in his eyes, to development.

My interest in Newar culture, first ignited in Darbar square the year before, became intensified as I learned (through reading Locke and fairly fruitless library searches) that remarkably little anthropological research about Newars had been done given their prominence in Nepalese history. Part of the reason for this, undoubtedly, was that anthropology had only relatively recently ventured into urban areas, and tended to concentrate on peoples at the periphery of state societies. Reflecting this tendency, much of the anthropological work at this time had focused on small Newar villages. The most prolific ethnographer of Newars to

date, Gérard Toffin, had published on *Panauti* and *Pyāngaõ*, and produced an ethnography that dealt with the second of these, a relatively small and remote village, as a whole.¹¹ Others who had produced ethnographic work that encompassed entire villages include Ulrich Müller, who had produced an ethnography of Thimi, Linda Iltis who had published on Bandipur, a largely Newar town outside the Kathmandu valley, and a Danish team of social scientists had written on the human ecology of Bungamati.¹² In her contribution to the multi-ethnic and multi-locale study of the status of women in Nepal, Bina Pradhan focused on the village of Bulu, only ten minutes' walk away from *Pyāngaõ*, and a tiny village of about 500 people at the time.¹³ Finally, Hiroshi Ishii had published on a small village about seven kilometers outside Kathmandu that he called "Satepa", where he concerned himself primarily with issues of social change.¹⁴ To the extent that ethnographers and other researchers had focused on the larger cities of the Kathmandu Valley as units of study, they tended to consider them and their architecture in terms of their organization around religious principles and ritual practices, the work of Niels Gutschow being the most extensive in this area.¹⁵

Other work, whether situated in the larger towns or small villages, was topically oriented, and occasionally the precise ethnographic context of the research conducted remained unclear or deliberately obscured for the sake of maintaining the confidentiality of those described. To put it rather roughly, the major themes that had emerged in the published literature in the social sciences on Newars prior to my arrival in Nepal in early 1982 were religious ritual, various aspects of Buddhist belief and practice, religious festivals, caste, kinship, the Newar language, art and

architecture, and other more mundane features of Newar material culture. Among those studies devoted to ritual, many focused on life-cycle rites as performed by members of particular Newar castes.¹⁶ Articles dealing with Newar Buddhism often dealt with the apparently anomalous status of the Buddhist ritual practitioner and absence of monks,¹⁷ just as articles dealing with caste often debated apparently anomalous features attributed to Newar caste hierarchy, such as its dual nature and the possibility of mobility within the system.¹⁸ Literature that aspired to make general statements about Newar society and culture also demonstrated the diversity to be found within Newar culture, even if they did not explicitly problematize it. Gopal Singh Nepali's book, *The Newars*, published in 1965, was the only major anthropological work available at the time that attempted to encompass Newar society as a whole. Based primarily on work he had done in Kathmandu and the village of Panga, it frequently makes generalizations that more modern scholarship would question, but it also provides numerous examples that demonstrate the difficulties that making such generalizations entails.¹⁹ In sum, important work that was vital to the success of my own research had been done, but there was much left to do.²⁰ I felt that it was particularly important to do research in one of the major cities of the Kathmandu Valley in a way that encompassed more of the diversity within it while at the same time deploying the intimate participant observation method to its full advantage.

In my second year at Columbia my interest in pursuing Newar studies was further intensified by another professor, whom I came to know as a result of my idle perusal of the "N" section of the Columbia course catalogue, where I was stunned to find Nepali being

offered by Professor Theodore Riccardi. My travels and my studies in anthropology had powerfully confirmed what I had learned from Rafe Jenanyan years before: that language provided an extraordinary window into culture, and learning the native language(s) of those whom I was to study would be essential to the success of my research. It had never occurred to me that Nepali would be offered as a regular course anywhere in this country. I would like to think that I would have eventually discovered this as the result of a deliberate search on my part in preparation for doing fieldwork, but pure chance led me to finding it as soon as I did. It was sheer generosity on Professor Riccardi's part that allowed me to begin Nepali in my second year, for I was to be his only student at the introductory level, a level he had not intended to teach that semester. I showed him my paper on Bungadya's chariot, which he kindly said he found interesting, but suggested I "sit on" for a while rather than attempt to publish. Though the class was in Nepali, Ted's knowledge of and fascination with Newar culture immediately became apparent and infectious. He was preparing Todd Lewis of the Religious Studies Department for doctoral research among Tuladhars of Ason, partly as a consequence of his long friendship with the late "Dad" Tuladhar, owner and proprietor of the Panorama Hotel. I recall vividly how, in a conversation about Bungadya the topic of his *śikhara* style Bungamati temple came up, and Ted said, "if we were there now, we would go to Bungamati and take a look at that temple." Getting to Nepal to do research suddenly seemed not only feasible, but also inevitable.

Columbia's anthropology department was then, as it seems always to be, a place of many perspectives and frequent debates. This suited me perfectly, of course. Perhaps the main division in the department at that time was

between those who embraced a "cultural materialist" theoretical perspective, and those who did not. The most diametrically opposed to the cultural materialist perspective were those who were, in various ways, sympathetic to Lévi-Strauss's structuralism or developments that derived from it. Among the faculty, cultural materialism was propounded most energetically and famously (and, perhaps, exclusively) by Marvin Harris. It is a theoretical perspective that asserts that the most effective means of explaining human behavior and thought is to understand how they serve humans in their quest to meet their material needs, particularly their need for food. From this point of view, apparently "irrational" beliefs and behaviors such as those related to the sacredness of the cow in India, can be understood as a kind resource management strategy that remains unknown to those who use it. After all, Hindus explain that they do not eat beef because cows are manifestations of the goddess Laksmi, among other reasons. The cultural materialist mode of explaining things took as its inspiration a fairly simplistic interpretation of Marxian theory, and garnered extensive popular appeal by virtue of the ways in which it appeared to "demystify" certain curious cultural traits. Opponents of this theory complained that it overlooked the importance of ideology in shaping the very environment that cultural materialists held to be so deterministic, and the fact that human beings often behaved in ways that were actually quite self-destructive with respect to the resources upon which they depended.

I go through the trouble of laying this controversy out because it revolved around the very problem that I had tried to approach in college: how can one relate aspects of human behavior and thought that are reflected in things like myth, and which seem quite removed from

material considerations, to more concrete aspects of human life? Neither side of this debate seemed to have a satisfactory answer, but the professor who had provided me an opportunity to write about the festival I had just seen in Nepal would also introduce me to a way of thinking about it that worked at resolving this polarized debate between those who emphasized the importance of material circumstance and those who stressed the significance of ideology.

Alex Alland, who had attended Lévi-Strauss's seminar on structuralism at l'École des Hautes Études in Paris at the invitation of Marshall Sahlins²¹, had recently become interested in another French theoretical development known as Structural Marxism, and offered a seminar on the topic. This perspective sought to understand material conditions and ideology as interrelated in mutually influential ways. It argues that, though any given physical environment obviously places absolute restrictions on the range of human activities possible within it (wet rice agriculture in the Sahara, for example, is clearly not a viable option), it is not possible to account for all human activity within a given environment on the basis of the constraints it imposes and possibilities it offers. There is nearly always an important element of choice in what people do, including what they eat, hunt, and grow. In fact, this theoretical perspective recognized that ideologically based motives could compel people to alter their physical environments, making the relationship between environment and ideology rather complex. For example, Jonathan Friedman's re-analysis and expansion of Edmund Leach's work in Burma²² showed that compelling ideas about status and gifts influenced productive activities, which, in turn, actually altered the environment in which people lived. Structural Marxists had a better understanding of Marx than did the Cultural Material-

ists, for they understood that Marx was not simply a material determinist. Rather than portraying humans as driven primarily by a quest for protein, they saw that Marx understood humans to be also compelled by creative and social needs that were being denied in the industrial economy of his time.²³ This made it possible for Structural Marxists to see relationships between Marxist theory and Structuralist theory that others had missed.²⁴ This perspective was highly appealing to me because it seemed to offer a nuanced solution to a fundamental problem that had seized my attention in a variety of ways for a very long time: the relationship between the intangible realm of human thought and the concrete circumstances in which humans live. It also gave me a way of thinking about the chariot festival that I thought could be highly productive.

While studying Nepali with Professor Riccardi, he let me know that Professor Alex Wayman of his department was at that moment reviewing John Locke's doctoral thesis on *Karunāmaya* as an outside reader, and arranged for me to read it. This work did not expand significantly on his article on Bungadyaḥ's chariot festival, but focused more on the rituals connected with the closely related deity, Janabāhādyāḥ, and the overall history of what he called "the cult" of *Karunāmaya*. Both of these aspects of his work helped me to formulate my own research, for two things became quite clear. The historical material showed that accounts for the origins of the festival shifted through time in ways that seemed to fit with their politico-historical contexts, and the series of ritual observations and accounts of origins associated with each of the five major *Lokeśwars* honored by Kathmandu valley Newars (Bungadyaḥ, Nālādyāḥ, Janabāhādyāḥ, Cobāhādyāḥ, and

Cākwādyah) varied from one another in interesting ways. Thinking in Structural Marxist terms, it seemed to me that just as accounts of origins have changed shift through time, so must they vary according to the material circumstances of those who offer them. Locke's work made it very clear that the devotees who came to honor Bungadyah varied widely with respect to caste, class, religion, and other sociocultural variables. My idea was to understand how participants' ideas about Bungadyah and his festival varied with respect to their background or, to put it slightly differently, their microenvironment.²⁵ Taking a tip from Lévi-Strauss, I would also carefully examine the annual festivals of all five of these Lokeśwars in order to better understand the basic principles upon which they were structured. This seemed like a good project because it would provide a better answer to that question that had presented itself when I first saw the festival (Why do people do this?), since it would accommodate a range of answers that would more fully acknowledge the diversity of people who make the festival possible. It also seemed to me to have the potential for better understanding Newar culture in general, for as we have seen, most of the studies thus far had focused on particular sorts of Newars living in particular places, and collectively they showed that there was substantial variation among Newars with respect to marriage patterns, religious beliefs, social hierarchies, and so on.

So, I proposed to do research on the chariot festival that would: (1) provide a better understanding of the festival by explaining how such diverse people could all come to collaborate in its performance, and by showing how festivals for very closely related deities varied from place to place;²⁶ (2) provide a means of better understanding what generalities could be made about Newar culture, as the

festival involved a wide diversity of Newars, and (3) use a theoretical perspective in a kind of context in which it had not yet been deployed. To put this in more "personal" terms, this research would allow me to explore something that intrigued me (the chariot festival) and to do so in a manner that would help me to work on a theoretical problem that I had been grappling with in various forms for a very long time (the relationship between ideas and the material circumstances in which they develop). It would also allow me to do this in an urban environment - a sort of place I had always loved and in a particular place that I had recently come to love. My personal motives for studying the chariot festival in particular and Newar culture in general were at once personal (they were compelling and reflected my individuality) and theoretical (in the sense that they pertained to broader issues through which my work could inform the work of others).

This research and the friends I made while doing it also led me to other interests that were equally compelling: another example of the complex relationship between ideas and material circumstance, I suppose. For example, I had initially planned to focus on variations in accounts of the origins of the chariot festival that different people offered, but I soon discovered that repeatedly asking about its origins only made me look foolish and missed the point. What people who did the "god's work" (*dyah-yā jyā*) were interested in talking about was how they and their ancestors came to be involved in the festival. Their explanations of their roles in the festival engaged religious ideology, caste, class, gender and other dimensions of who they were in complex ways, and compelled me to focus more thoroughly on theoretical problems concerning personal identity.

Montréal had prepared me to understand the

critical relationship between language and cultural identity and appreciate the practical importance of speaking Nepal Bhāshā (the language of Newars) for my research. To do research among Newars in Nepali in the early 1980's seemed as inappropriate to me as working with Québécoise in English would have been in the early 1970's. I was not prepared, however, for the extraordinary hospitality and encouragement that even my earliest faltering attempts to speak the Newar language would elicit. These interactions, the *Nepal Sambat nhu dā* (new year) processions,²⁷ and other experiences in the early 1980's vividly demonstrated to me the degree to which Newars felt that their cultural heritage was under threat. This, and the new politics of identity that has emerged since the *jana āndolan* (people's movement) of 1990 have prompted me to direct my attention to the ways in which ethnic identities are being reconceptualized and renegotiated in the context of democratization. So my interests in the subtleties of personal identity construction and the politics of ethnicity (which are obviously interrelated) are both products of my learning about the priorities and passions of those Newars with whom I have studied.²⁸

Since writing my dissertation, I have become interested in trying to better understand what might be genuinely new about what has been variously called postmodernity, the global economy, late capitalism and so on.²⁹ Part of this interest is spurred by my knowledge of Nepal, where international cultural influences have long been felt, and where these influences have long been evident in sometimes surprising ways. I often hear colleagues declare certain kinds of situations to be new, or "postmodern," that I know to be quite old in Nepal. I often want to ask, "New for whom? The anthropologist or those she studied? Whose voice are you *Newāh Vijñāna -4*

listening to?" Another reason for my interest in sorting out what might be really new about the era in which we live is the apparently dramatic rate of change occurring in some aspects of life in Nepal today. This new interest has caused me to look back at my research on the chariot festival with new eyes, and to look forward to a new research project.

Looking back at my work on the chariot festival, I realized that I had pursued what I would now call a postmodern problem. As I noted at the beginning of this essay, according to many of its commentators, part of the postmodern condition is that explanations for things are understood to be inevitably enmeshed in particular political, cultural, and social contexts, thus making it problematic to privilege only one point of view. In anthropology this has manifested itself in new attempts to give voice to multiple perspectives, which anthropologists have described as attending to "polyphony" or "heteroglossia"³⁰. I was quite surprised when a recent graduate student congratulated me on my completely "postmodern" dissertation - something that I had not intended to write, but which a graduate student ten years later saw as such. I had, after all, "attended to the voices" not only of priests, but carpenters, potters, painters, and others who played critical roles in the festival. What I experience in Nepal continues to shape what I feel compelled to understand about Nepal and the world and my ways of trying to understand them (my theoretical perspective).

Looking forward, I am now conducting research on recent transformations at religious sites in the Kathmandu valley. Just as I was stunned to see Darbar square when I first set foot into it nearly a quarter of a century ago, so I was stunned many times upon returning to Nepal in 1998 after six years of absence, but this time it was not the sight of the old but of

the new that surprised me. Swayambhu is being surrounded by a *māne* wall featuring brilliantly colored *stupās*, and a fifty-one foot tall Buddha has risen at its northern flank, the temple at *Jana bāhā* is being covered in 108 extraordinary gold-gilt *Lokeśwar* images, an entirely new *bahi* and *stupā* is built on the summit of Pulcowk, *Āju Dyah's* tiled temple in Indracowk is being rebuilt from the ground up, and on and on. My reactions to developments like these have ranged from delight to horror: delight at seeing so many contribute to religious works as they have done for centuries, and horror at some of the destruction that seems to come with construction. As friends in Nepal send e-mails telling me of more and more developments at religious sites, I am convinced that the Kathmandu Valley is seeing a flurry of construction and renovation at religious sites the likes of which it has never seen before. Is something genuinely new going on here? Or are these things simply the products of the age-old impulse to transform sacred sites through devotional activity? Are these developments at religious sites related in any way to the new politics of identity? I want to understand these things for personal reasons that are theoretical and theoretical reasons that are deeply personal.

Postscript:

Four hours after my arrival in Nepal this summer, the royal family was decimated by a tragedy that has no precedent in world history. Though it was not my intent to study the role of royalty in Nepal today, circumstances demanded it. One of the aspects of the chariot festival that led me to study it was the role played by the king and beliefs about the links between the fate of the king, kingdom, and festival. The festival put in relief ideas about the king and kingdom, and since 1991, the elected government as well. The recent massacre also brought such ideas to

Newāh Vijñāna -4

the surface and has compelled many to reconsider them. I will reassess some of the theoretical tools I used to understand the nature of the Hindu Kingdom as it was revealed in the context of the festival of Bungdyaḥ, and will be looking for new theoretical tools to understand what it means to live in the Hindu Kingdom of Nepal. This investigation will also be deeply personal as I am compelled to understand the baffling array of reactions that emerged from my friends and acquaintances as well as from myself.

Acknowledgements

I am grateful for the comments on previous version of this paper that Steven Rubenstien, William Fisher, Dayā Ratna Shākya, and Diane Ciekawy have offered me, as I am to the many gurus, Newar and otherwise, who have taught me. As it is conventional for South Asian musician to state at their performances, whatever errors remain are my own.

Notes

1. For the sake of simplicity for the non-specialist, well-known names have been rendered, for the most part, without diacritics in conventional forms, hence Swayambhu is here rendered Swayambhu, and *Buṅgadyaḥ* is here rendered Bungdyaḥ. Widely used Sanskrit or Newar words have also been rendered in conventional form, hence *saṃgha* is here sangha. I have retained the authors' own transliterations and spellings in citations of their works, as Newar spelling is far from conventionalized. The final short 'a' is rarely pronounced in Nepal Bhāshā, and is therefore omitted unless the Sanskrit form is used. Nasalization of a vowel is indicated by a following 'ṃ,' and, finally, 'ḥ' is used to indicate the prolongation of the vowel that precedes it, indicated in Nepal Bhāshā with the *visarga*.

2. Here I am alluding specifically to writings by Rosaldo (1989), Desjarlais (1992), and Belmonte (1989), respectively, in which these authors have all explicitly written about their reflections on their relationships with those whom they studied. These are just a few among many possible examples of those who have published on this issue.

3. Anthropology is conventionally divided into the four disciplines of Linguistics, Archeology, Physical Anthropology, and Socio-Cultural anthropology, the latter involving the study of the culture and society of living

Owens, Bruce McCoy / 'Personal Theory: ...15

populations, typically through the use of extended periods of participant-observation research.

4. Williams 1983 (Pp. 316-317)

5. Vallières 1965

6. Berger and Luckman's *The Social Construction of Knowledge* (1966) was a key text at the time.

7. One of the most influential works on this topic at the time was Edward T. Hall's, *The Hidden Dimension* (1966).

8. This refers to Clifford Geertz's influential essay, "Thick Description: Toward an Interpretive Theory of Culture," (1973) in which he examines the limitations and possibilities for the study of culture, and whose thinking in this essay has certainly influenced my own regarding these issues. In retrospect, I am sure that my early admiration for Gregory Bateson's *Naven* (1958), which examines Iatmul ritual in New Guinea from several alternative theoretical perspectives as well as from multiple indigenous points of view had everything to do with being in Montréal when I was. I have pursued this particular theoretical problem in my article, *Envisioning Identity*. (2000)

9. The simplest example of this kind of analysis produced by Lévi-Strauss is to be found in his essay

"The Structural Study of Myth" (1963)

10. Locke 1977, Pp. vii-viii.

11. See Toffin 1977 and Barré et al 1982.

12. See Müller 1981, Iltis 1980, and Lotz et al 1974. Davies et al (1981) had also published a book on the town of Kirtipur dealing primarily with development issues.

13. See Pradhan 1981.

14. See Ishii 1980a, 1980b, and 1972.

15. See Gutschow 1975 and 1977a, Gutschow and Bajracharya 1977, and Gutschow and Shrestha 1975. Herdick (1977) had published the first of what were to become many articles on this topic, and Jha (1978), Toffin (1981), Kölver (1976) had also written on the subject, as had Sekler (1979), whose interest in Newar architecture and use of space in urban contexts had begun to have an enormous impact on architectural preservation in the valley. Toffin and his colleagues had also turned their attention to the use of space in the domestic sphere (Barré et al 1977; Toffin et al 1981; Le Port 1981).

16. See Bajracharya 1959, 1960, 1972, Toffin 1979a, 1975c. Locke's 1975 article on Buddhist initiation rites includes those that could be considered life-cycle rites as well as other of a more optional nature. Articles on other kinds of religious ritual performed in *guthi* contexts that had been published before 1982 include Toffin 1976b, Vergati-Stahl 1979, and Tuladhar 1979. Other topics covered within the category of religion include the Kumari, to whom four pieces, including Allen's important work, had been devoted by 1981 (See Allen 1975, Moaven 1974, Natani and Omura 1977, and Vergati-Stahl 1980); religious aspects of the monarchy (Vergati-Stahl 1981, Toffin 1979b), and religious syncretism (Lienhard 1978a,b).

17. See Allen 1973 and Greenwold 1973a&b and 1974. Snellgrove (1957) had raised some of these issues much earlier, and Kloppenberg's important 1977 article provided a

history of *Theravāda* critiques of Newar *Vajrayāna* Buddhism.

18. With regard to these debates about caste, see Greenwold 1977a and 1981, Rosser 1978, and Vergati-Stahl, 1975. Other important early work on caste in Newar society includes that of Fürer-Haimendorf (1956, 1960a, 1960b) and Greenwold (1975, 1981).

19. Though produced under the aegis of G.S. Ghurye in the Department of Sociology at the University of Bombay, his participant observation approach and ethnographic concerns make Nepali's work (1965, 1960) eminently anthropological. Nepali identifies the early article by Chattopadhyay (1923) as perhaps the only work of "some sociological value" on Newars to precede his own (1965:ix), though notes that it is based entirely on previously published data, largely from the work of Brian Hodgson (1874), Kirkpatrick (1975[1811]), Oldfield (1981[1880]), and Sylvain Lévi (1905), all of whose work (especially Lévi's) continues to be cited by scholars of Newar society today. Hosken's (1974) work documents the architecture and spatial layout of towns throughout the Kathmandu valley, and considers the changes taking place within them.

20. Though this is not intended as a comprehensive literature review of work on Newars prior to 1982, I would be remiss not to note some of the major contributors to the field in the other topical areas I have mentioned. Austin Hale (for example Hale and Hale 1971, Hale and Shresthacharya 1973), Kamal Prakash Malla (1981a, 1981b), Tej Raj Kansakar (1972, 1977, 1981), and Iswarānand Shresthāchārya (1976, 1981) (Shresthacharya et al 1971), (Shresthāchārya and Tulādhar 1976) had contributed prodigiously to the linguistic study of Newar language. Hale and his collaborators had produced over twenty works on the topic before 1982.

Among those who had written on Newar festivals were Gutschow (1976, 1977b), Kölver (1976, 1980), Toffin (1978a, 1981), Tailhet (1978), Acharya (1971) and MacDonald (1972). Locke's work on this area has already been noted. Anderson's survey of Nepalese festivals (1971), though rather brief with respect to each of the festivals she covered, and intended for a general audience, has frequently been cited in scholarly works concerning Newar festivals.

Shresthacharya (1977) and Toffin (1975e) had published articles on Newar kinship terminology, and Dumont had long before in a provocative article considered whether or not Newar marriage practices were anomalous in comparison with other South Asian caste societies (1964).

Bernier (1977, 1978, 1979) had published on Newar temple architecture, as had Korn (1976) and Snellgrove (1961), and Slusser (1974, 1975) had published some of the work on this topic that was to culminate in her later magnum opus, *Nepal Mandala* (1982). Slusser had also published on Newar art in collaboration with Gautamavajra Vajracarya (1973). Others who had produced work on this topic included Bernier (1970) and MacDonald and Vergati-Stahl, whose beautifully illustrated book focused on art of the Malla period (1979). Traditional artistic techniques also received attention from Alsop and Charlton (1973), Gutschow

(1976a), and Labriffe (1973).

More mundane aspects of Newar material culture had been considered in works by Charpentier (1973), Müller (1981), Reinhard (1969a,b), Höfer (1980) and Toffin (1975b, 1976a). Agricultural techniques and associated material culture had been considered much earlier by Hodgson, and more recently by Zurick (1981) and Webster (1981), whose work focused on Newar ideology regarding the use of the plow.

Given the importance of the topic, I must also note that Toffin, in an obscure but prescient work, examined the now much investigated subject of identity negotiation and construction over twenty-five years ago (1975a). Numerous Newars had also published work in Newari which was, of course, not accessible to me before my language training in Nepal, but which could fairly be described as ethnographic or otherwise of great interest to anthropologists as descriptive or analytic material even though the authors were not necessarily trained in a social science discipline. Hemraj Shakya's encyclopedic works on Swayambhu (NS 1098) and images of the Buddha (NS 1097), Amoghabajra Bajracarya's extensive work on the various forms of Lokeshwar (NS 1099), and Ratna Kaji Vajracarya's 'Key to Viharas in Nepal' (N.S. 1103), serve as just a few examples of Newars writing about their own culture in systematic ways that elucidated it as well as produced it. Two of Ratna Kaji Vajracarya's later works, *Newāh Samskāra Samskrīyā Tahcā* 'Cultural Heritage of the Newar' (N.S. 1109) and *Jhigu Samskrīyā bvo-ghāsā* 'Items of Our Food Culture' (N.S. 1102), serve even better as examples of this genre.

Finally, to reiterate, this review of literature is not exhaustive, but is a fairly thorough examination of the social-scientific work concerning contemporary Newar culture and society that had been published as I entered the field in the beginning of 1982. I apologize for any omissions and the inevitable distortion that occurs when one attempts to categorize the work of others.

21. One of the most influential anthropologists in the United States and a graduate of the Columbia Department who pioneered this line of theoretical interest in his seminal work, *Culture and Practical Reason* (1976), and more recently in *Islands of History* (1985).

22. Freidman 1975, Leach 1965.

23. These ideas are elaborated most clearly in his concept of "species being" and "human requirements" in his "Economic and Philosophical Manuscripts of 1844" (see Marx 1978:70-101).

24. The importance of social contradiction to both structuralist and Marxian theory also provided an obvious connection through which to create a synthetic approach derived from both perspectives.

25. What anthropologists often refer to as "habitus," inspired by the work of Bourdieu (1977).

26. This I later developed in my article, "Human Agency and Divine Power" (1995).

27. These processions, often in the form of motorcycle rallies, celebrated the beginning of the new year (*nhu dā*)

when it occurred according to the *Nepāl Sambat* calendar used by Newars.

28. I was also surprised to see Buddhist priests who were honoring an exemplar of compassion officiating at numerous sacrifices. This compelled me to pursue another line of research - sacrifice - and to write about my findings in my dissertation and in my article entitled "Blood and Bodhisattvas" (1993).

29. Perhaps the most famous and influential of writers on this topic are Frederic Jameson (1984) and Jean François Lyotard (1979).

30. See Owens 2000:702-705

How Tibeto Burman Is Nepal Bhāshā Today ?

Daya R. Shakya

Center For Nepalese Language and Culture
Portland, USA

1.1 Introduction¹:

Nepal Bhāshā¹, a language spoken in Nepal Valley (currently known as the Kathmandu Valley) has been widely used by the ethnic group called Newars living in 61 districts throughout the country of Nepal. The Newars account for 3.61 percent of total the population of about 20 millions. This language manifests evidence of spoken and written traditions, tracing back to manuscripts and documents available since Nepal Sambat 234 (1114 AD). Once it was the official language of Nepal, but in the course of historical changes the title of ‘official language’ has been devalued.² Due to the lack of awareness among native speakers, heavy influence of Indo-Aryan languages, and the monolingual policy of Nepalese government in communication and education, Nepal Bhāshā has been on a course of deviation from its Tibeto -Burman features, and eventually may face extinction or become a dead language. This paper discusses the problem of deviation due to the influence of Non Tibeto-Burman languages, including Nepali, English, Sanskrit, Hindi, Maithili and Pali. Not much work has been done in this field except by a couple of authors, Joshi (1986) and Newāmi (1997,1998). Besides this an attempt to trace the root of some Nepal Bhāshā verbs has been undertaken by Hargreaves and Tamot (1985)³. They have illustrated some verbs that relate to Indo-Aryan and Tibeto-Burman roots. In addition a case study of language use (Nepal Bhāshā or Nepali) among Udās Newars was conducted by Shrestha (1989/97). My focus in this paper will be on Non -Tibeto-Burman links.

Before getting into the problems of Nepal Bhāshā, it is useful to raise the following questions. What are the distinctive features of Tibeto-Burman languages? Do they refer to prosodic, phonemic, morphemic or syntactic features ? How is a group of languages distinguished as Tibeto-Burman or Non-Tibeto-Burman ? The questions formulate the key topics in discussion of the distinctive features of Tibeto-Burman languages spoken in Nepal.

By the end of the 20th century, a Himalayan linguistic studies group had arisen from a large group of Sino-Tibetan linguists and given birth to the Himalayan Languages Symposium⁴ which was focused on languages spoken in the Himalayan regions. This group has further specialized into a group of Tibeto-Burmanists and gathered in a common place to discuss the features of Tibeto-Burman languages. We have thought to establish more firmly the specific, precise and distinctive features which characterize Tibeto-Burman languages without the influence of Non-Tibeto-Burman languages⁵.

1.2. Nepal Bhāshā as a Tibeto-Burman Language:

Looking at the characteristics of Nepal Bhāshā as a Tibeto-Burman language we may come across the following features:

- (1) **Prosodic:** Nasalization
Phonemic: quality of vowel, vowel length, diphthongs, place and method of articulation, voicing of consonants, aspiration, breathy voice, gemination of consonants.
Morphemic: **Nominal:** plurality, gender markings, classifier, case marks, set of numerals
Verbal: tense and person marker (agreement Vs. first and non first distinction), nominalization, causativisation, finite and non-finite constructions.
Syntactic: Relativization, complementization, grammaticalization, usage of syntactic and conjunctive particles etc.

All of these features will be discussed here to examine the influence of the following languages: Nepali, Sanskrit and English⁶. Due to the heavy influence of these dominating languages, the Tibeto-Burman features of Nepal Bhāshā have been gradually deviated. Although this language has a long tradition of written history as well as literature of high level studies, it has become a matter of interest to find out how far Nepal Bhāshā has deviated from the core features of Tibeto-Burman languages.

Historically, in the eastern tradition, a person is considered qualified and educated when he/she acquires knowledge of Sanskrit or English. This tradition was overwhelmingly admitted in the past and modern period. Due to this conceptual acceptance any Newar speaker who knows Sanskrit holds a good reputation in literary society. Therefore, a piece of written and spoken text by a well-known writer is highly influenced by either Sanskrit or English lexical items either directly or indirectly. We will discuss this in detail in later sections.

The topic I am discussing here is a little controversial. From the very beginning of study of Nepalese languages, Nepal Bhāshā has been recognized as a Tibeto-Burman language (Grierson 1909, Shafer 1952). However, a look at the influence from other dominating languages such as Nepali, Hindi, Sanskrit, English, Maithili and Pali, shows that the retention of the core structure of Tibeto-Burman features is gradually fading from Nepal Bhāshā. This can be verified from classical, colloquial and literal data including the usage of lexis and recorded text and discourse materials. Such an examination raises the following two questions:

Does Nepal Bhāshā retain the features of Tibeto-Burman languages ?

How much influence of Non Tibeto Burman languages has taken place in Nepal Bhāshā ?

The borrowing of lexis from one to another language is a common feature in most situations of language contact. Similarly, the borrowing of vocabulary from dominating languages is also common in Nepal Bhāshā. However the question of whether the Nepal Bhāshā has borrowed vocabulary from those languages or if they originally shared the same vocabulary is an interesting subject to investigate in the study of language contact.

2.1 Relationship between Nepali and Nepal Bhāshā

There is a continual argument on the relationship between Nepali and Nepal Bhāshā than from other Tibeto Burman languages. Both of these languages hold in one way or other ‘National Status’ carrying the word ‘Nepal’ in their names. Whereas typologically one is Indic and the other Tibeto-Burman. Well known scholars around the world write the history of the development of the Nepali language from Pāhāḍi kurā, Parbate kurā, Khasa Kura, Pāhāḍi Bhāshā, Gorkhāli Bhāshā and Nepāli Bhāshā. The Same scholars consider the development of Nepal Bhāshā into Newāri and Newār.

(2) Parbate --> Pāhāḍi--> Khasha--> Gorkhāli--> Nepāli
Historical Development of Nepali

Nepāl Bhāshā ----->Newāri -----> Newār
Historical Development of Nepal Bhāshā

The gradual development of Nepal Bhāshā indicates more influence from the Nepali language. Shrestha(1989/97) states that the formal and informal usage of language among Udās Newars are typically Nepali and Nepal Bhāshā. Currently, it has become difficult for native speakers to sort out native and non-native vocabulary. Finding a good informant for linguistic analysis is problematic because many Newars are ignorant of native and core vocabulary⁷. If a list of vocabulary already exists in a language, the use of lexical items of the same meaning from other languages is unnecessary. For instance, some of the following kinship terms used in Nepal Bhāshā are unnecessarily borrowed from Nepali and English:

(3) Kinship Vocabulary⁸

<u>Nepal Bhāshā</u>	<u>Nepali</u>	<u>Gloss</u>
tatā	didī	elder sister
dicā dāju	bhināju	bother-in-law
tatāju/ pi:ta	bhāju	sister-in-law
maleju	māju	maternal aunt
kijā	bhāi	y. brother
bājyā	hajurbā	g. father
bajye	hajurmā	g. mother
kakā	kākā	paternal uncle

<u>Nepal Bhāshā</u>	<u>English</u>	<u>Gloss</u>
mā	mommy	mother
bā	daddy	father
nini	ānty	aunt

The benefit of borrowing these words is that the speaker is considered modern and educated, a prestigious position in the modern Newar Society. Therefore, a large number of well-educated Newāḥ Vijñāna -- 4

Newars do not use the Nepal Bhāshā words in many circumstances.

In the discussion of evolution, the analogy of the chicken or the egg is apt. Which comes first is still a matter of controversy. Similarly, the conflict between Nepali and Nepal Bhāshā writers on the origination of a set of lexon used in both languages is still ongoing. The following set of words is shared in both languages.

(4)	/pasala/	‘store’
	/jyāsala/	‘work place’
	/jhyāla/	‘window’
	/kapāla/	‘forehead’
	/māgāla/	‘sewage’
	/degala/	‘temple’

Nepali language advocates claim that a word like /jhyāl/ is of Nepali origin (Sāpkotā : Source: Roop Rekhā :118), whereas a Newar linguist (Mali 1986:111-137) also claims that Nepali speakers borrowed the word from Nepal Bhāshā. The nominative forms of these words in Nepal Bhāshā delete the final consonant and maintain the phonological process of compensatory lengthening of the vowels. When these words take the oblique case marks the final consonant appears and the suffix is added to the underlying form(Hale 1986).

(5) <u>Nominative</u>	<u>Locative</u>	<u>Ablative</u>	<u>Gloss</u>
Pasah	Pasala-ye	Pasal-ā	store
jyāsah	jyāsala-ye	jyāsal-ā	work place
jhyāl	jhyāla-ye	jhyāl-ā	window
kapāh	kapāla-ye	kapāl-ā	forehead
māgāh	māgāla-ye	mangāl-ā	sewerage
degah	degala-ye	degāl-ā	temple
Makah	makāla-ye	makāl-ā	portable fire pot

My arguments for claiming these words are from Nepal Bhāshā is that in the Kathmandu Valley there are several localities which are named with similar words ending with phoneme /-l/ (Shakya 1998), as follows:

(6) <u>Underlying</u>	<u>Nepali</u>	<u>Nepal Bhāshā</u>	<u>Gloss</u>
/kilāgala/	Kilāgal	Kilāga:	elephant barn
/chikā mugala/	Cikanmugal	Cikāmuga:	place of oil pressing
/ten gala/	Tengal	Tenga:	sheep wool supply
/sau gala/	Saugal	Sauga:	place of cow dung supply

In Nepal Bhāshā, the suffix /gala/ -> [ga:] refers to a place where pet animals or birds {e.g. [phā-ga:] ‘pig farm’ [khā-ga:] ‘chicken farm’} are kept as well as a place for working in oil production, wool supply or cow dung fuel supply etc. In addition, the suffix /ghala/ --> [ghah]

refers to a vessel for reserving liquid substances. In the ancient Kathmandu Valley, it is believed that several vessels were installed in some localities and eventually those places were named after the vessels. The names are preserved still today as illustrated in (7) below⁹ :

(7) <u>Underlying Form</u>	<u>Nepali</u>	<u>Nepal Bhāshā</u>	<u>Underlying Meaning</u>	<u>Current Name</u>
woha ghala	wongal	wōga:	place of silver vessel	Indra Chowk
na ghala	naghal	nagha:	place of Iron vessel	----
sija ghala	Sighal	sigha:	place of Copper vessel	----
nhuh ghala	nhughal	nhu:gha:	new vessel (made of Stone)	Jaisi Degal

What is shown from these examples(5,6,7) is that the words ending with phoneme /-l/ are originally from Nepal Bhāshā and have been changed into modern form by maintaining the process of compensatory lengthening. The Nepali speakers borrowed underlying forms from Nepal Bhāshā. Etymologically, the word /ghala/ cognates with /ghata/ 'vessel' in Sanskrit and Hindi. The names of the above localities were in use long before the Nepali language became the vernacular of Nepali citizens living in the Kathmandu Valley. It is obvious that Nepali speaking people did not bring names for each and every locality as they migrated from the hills to the valley.

Moreover, it is awkward to talk about the influence of Nepali in Nepal Bhāshā; to a large number of well established high class Newars, it has become fashionable to communicate in Nepali. The Newars who speak Nepal Bhāshā to each other are considered to either be activists against the government's policy of gradually poisoning Nepal Bhāshā or Pundits influenced by literary people or professional Nepal Bhāshā teachers. A large number of Newars do not read or write Nepal Bhāshā at all. To make matter worse, Newar children's learning is modeled by growing popularity of modern boarding schools that encourage them to chat in English and sing rhymes in Nepali and English. Parents themselves show a high level of satisfaction in their children's progress of learning non-native languages. Due to the influence of playmates and the praise Newar children receive for speaking Nepali, the more and more children are encouraged to give up the mother tongue and adopt Nepali as their own language¹⁰. With this situation we find some phrases that appear very odd in Nepal Bhāshā. Newar youths are less aware of native vocabulary and are likely to use Nepali words very often. A partial list of the unnecessary borrowing of words from other languages was presented by Tamrakar (1999) as follows:¹¹

(8)	<u>Nepali</u>	<u>Nepal Bhāshā</u>	<u>Gloss</u>
/k/	kitāb	saphu:	Book
	kaḷam	chwosā	pen
	khushi	layatā	joy
/c/	cithi	pau	letter
	chandramā	timilā	moon
/j/	jawāph	lisah	answer
	jahān	kalā:	wife
	jiu	mha	body
	jholā	mhichā	bag

/t/	tanna	tyanka	full of appetite
/d/	ḍhokā-	dhwākhā	gate
/p/	pariwār	jah	family
	prakāsak	pikāka:	publisher
	prashna	nhyasah	questions
	patrikā	cwosu munā	magazine
	pole juigu	hiie	heal
/b/	battā	dyā	box
	bicār	dhāpuh	idea
	pramāna	dasu	proof
	bibhinna	thithi	different
/s/	samma	jaka/taka	upto
	sampādak	munāka:	editor
	sattā	palesā	substitute
	sadasya	dujah	members
	sarpa	tāhā	snake
	saphā sughar	sucu picu	cleanliness
	sthāpnā	palisthā	establish
	samparka	swāpu:	connection
/l/	lāit	ja:	light
	lāgi	nintin	for
/h/	hajur	jyu/ hai	vocative
/a/	akhbār	bukhan pau	newspaper
/ā/	āshcarya	ajucāye	surprise
	ātā	chuchun	flour
	ākās	sarga:	sky
	uthe juigu	danegu	stand up

Besides these words, Newar speakers also use following compound verb forms [Noun/ verb + yāye or juye], borrowing the initial words from other languages:

Verbs

(9)	<u>Nepali</u>	<u>Borrowed forms</u>	<u>Nepal Bhāshā</u>	<u>Gloss</u>
	nimtyāunu	nimtā yāe	bwone	invite
	kamāunu	kamae yāye	dhibā mune	earn
	mātnu	māte juye	(thon)-kāye	intoxicate
	hepnu	hepe yāye	hiwāe chuwāe yāye	humiliate
	pachutāunu	pascātāp yāye	pastāye cāye	pretend

Noun + Verb

binti garnu	binti yāye	jojalapā yāye	greet
bhāsan garnu	bhāsan yāye	nwacu biye	give a speech

kamjor hunu	kamjor juye	bamalāye	to be weak
mātna lāunu	māte yāye	thō kāyeke	to make intoxicate
bāntā garnu	bāntā yāye	lhoye	vomit
dhokā khānu	dhokā naye	?	deceive

The verbs /yāye/ ‘do’ and /juye/ ‘happen’ are widely used in compounding borrowed English words as follows:

(10) <u>English</u>	<u>Gloss</u>	<u>Nepal Bhāshā</u>
home work yāye	to do home work	chējyā yāye
shopping yāye	to go for shopping	pasa wane
teaching yāye	to teach	ākha syane
tired juye	to be tired	tyānuye
bore juye	to be bored	mhāi puye
typing yāye	to type	ākha dhwāe

Similarly, the Sanskrit roots with Nepal Bhāshā /-rape/ auxillary is commonly available in classical Nepal Bhāshā (Malla 2000) texts too.

(10.1) cinta-rape	‘think’
rasa-rape	‘enjoy’
basa-rape	‘settle’
dhara-rape	‘hold’
rakshya-rape	‘protect’
bhaja-r[1]ape	‘pray’

The names of months(mahinā), days(bār) and number of years(sāl) are expressed with Nepali forms on almost all the occasions listed below:

(11) <u>Name of the months</u>	<u>Name of the days(-bār)</u>	<u>Name of the year (sāl)</u>
baiśākh mahinā	āitabār, sombār,	Sat (7) sāl, satra sāl(17)
jestha, aśār	mangalbār budhabār	chhatis sāl (36)
sāwan, bhadra	bihi bar, sukrabār, Sanibār	chayālis(46) sāl
āświn, kārtik		

In addition, the phrases that include month, day and year are Nepali oriented for the following interrogatives:

- (12) How long have you been pregnant ?
How old is your child ?
Which day are you coming to visit us?
What time it is now ?

(12.1) <u>Nepali influence</u>	<u>English</u>	<u>Nepal Bhāshā</u>
guli mahinā data	How many months ?	golā data
jim machā sorha barsh data	my child 16 years old	jim macā jhinkhudan data
chu bār wayegu	Which day coming ?	chu khunu wayegu
guli baje jula?	What time it is now?	chu tā: i: jula

Newar speakers prefer to use /mahinā/, /barśa/, /bār/ and /baje/ rather than /lā/, /dā/, /khunu/ and /īla/. Besides, they also prefer to use the following phrases:

(13) <u>Nepali</u>	<u>Nepal Bhāshā</u>	<u>Gloss</u>
ek chhin	palakha	a moment
ek ghantā	ghauchhi	an hour
ek minute	chagu minute	a minute
ek second.	chagu second	a second

In summary, looking at all the above examples it reveals how difficult it is to find a true speaker of the Newar language these days. The younger the speaker the harder it is for them to speak their own language without the influence of other languages especially non Tibeto-Burman languages.

3.1 Relationship Between Nepal Bhāshā and Sanskrit:

The relationship between Nepal Bhāshā and Sanskrit is undeniable. Even though these two languages originate from two different families, Indo-European and Sino-Tibeto, their relationship is ancient, closed, and very important. We may assume that there is no other Tibeto-Burman language spoken in Nepal that has close relationship to Sanskrit¹². The recently published of “*The Dictionary of Classical Newari*”(Malla 2000) includes entries collected from literary texts, palm leaves, inscriptions, and colophons spanning 900 years, beginning with a text written in Nepal Sambat 235 (1115A.D.), and much of it is essentially Sanskrit. In a study of classical Nepal Bhāshā texts a well known western scholar S. Lienhard notes, “ Everything that has been written in Newari is conditioned by Sanskrit Literature” (1962: 75, DCN 2000: XII).

It is unthinkable that without Sanskrit, Nepal Bhasa does not exist. A large number of nominals of Classical Nepal Bhāshā includes Sanskrit loan words. In the classical period, Sanskrit was recognized as the genuine, academic, religious and divine language of the whole South Asian region. Therefore, the influence of Sanskrit is unavoidable in many of the languages spoken in the region, including Tibeto-Burman languages such as Nepal Bhāshā and possibly Thangmi (Turin 2000) and others. It is undeniable that a large percentage of Nepal Bhāshā vocabulary originate from Sanskrit roots and are used as the *Tatsam* (as it is) and *Tadbhava* (phonologically changed) forms. Many of the *tadbhava* words underwent phonological change and were assimilated as non-Sanskrit forms. Unless and until etymological verification is done, the *tadbhava* words will not be easy to identify and distinguish from Nepal Bhāshā nominals. In the introduction to the *Dictionary of Classical Newari*, the chief editor, Malla (2000 page XIII) claims that most of the

classical Nepal Bhāshā texts contain 25% of Sanskrit loan words in the form of *tatsam* and *tadbhava*. Regarding the classical text Jorgenson notes, “As to the vocabulary, I must state the regrettable fact that a rapid increase of the number of *tatsamas* is taking place”.(*Jorgenson: ‘Vicitrakarnikava badānoddṛta’* 1931: 2 in Malla 2000:XIII). Some examples of *tadbhava* and *tatsam* words collected by Tamot (1986) from various classical texts are as follows:

<u>Tatsam</u>		<u>Tadbhava</u>		
<u>Sanskrit</u>	<u>English</u>	<u>Sanskrit</u>	<u>Nepal Bhāshā</u>	<u>English</u>
naraka	hell	ghritam	ghya:	butter
surya	sun	mahisa	mye:	buffalo
pāp	sin	lakshana	lachin	feature
dharma	religion	goṣṭhi	guthi	group
sangha	society	hansa	hayen	duck
santosh	satisfaction	swāsa	sāsa:	breath
ātmā	soul	markata	māka:	monkey
buddhi	knowledge	sthala	thāye	place
nāga	serpent	dhupa	dhun	innocence
ista	relative	deva	ḍya	devine being
iswora	devine person	bhrahmāna	barmhu	priest group

All these Sanskrit words are commonly used in current Nepal Bhāshā as well as in the classical texts. For the purpose of current study of the classical text and the influence of the Indic languages, the *Dictionary of Classical Newari* (Malla 2000) is the main source of verification on the degree of influence of Sanskrit words in Nepal Bhāshā. In this connection, Kolver and Shresthāchārya note: “In order to avoid futile repetition the more reasonable solution seems to be to handle the Nepali stratum respectively rather than extensively. In practice, this means that any Newar dictionary of the present-day language will have to be used with a Nepali one along side, and if it comes to learned publications, one of Sanskrit.” (Kolver and Shresthacharya 1994:VII).

It is a fact that a large number of Sanskrit words are common in both Nepali and Nepal Bhasa. On the basis of this fact, Nepali advocates claim that Nepal Bhāshā borrowed those words from Nepali. The native Newars believe that this comment is not favorable to them. Many of Sanskrit loan words entered Nepal Bhāshā through Prākṛit (older colloquial forms of Sanskrit) with some phonological change as in the following examples:

(15)	<u>Sanskrit</u>	<u>Prākṛit</u>	<u>Nepal Bhāshā</u>	<u>Gloss</u>
	jyoti	jati	ja:	light
	swora	swola	sa:	sound
	āgama	āgam	āgā	sacred shrine
	koṇa	kuna	kū	corner
	jora	jor	jo:	pair
	karkataka	kakali	ka:li	crab

Moreover, we also find some words which are commonly found in both languages, and stabilize the respective pattern of sound change in both languages as in the following examples collected by Tamot¹³(1986):

(16)	<u>Sanskrit</u>	<u>Prākṛit</u>	<u>Nepal Bhāshā</u>	<u>Nepali.</u>	<u>Gloss</u>
	manuśya	manukha	manu:	mānche	human
	grāma	gāma	gā	gāū	village
	kāka:	kwokha	kwa:	kāg	crow
	kachchhura	kāila	kai	khatirā	pimple
	kachhapa	kāpare	kāule	kachhuwā	turtle
	kantaka	kaṇḍaka	kā	kāṇḍā	thorn
	ghritam	ghrita	ghyah	ghyughee	butter
	peṭa	pwātha	pwāh	peṭ	stomach
	hansah	hansa	hayen	hānsa	duck
	bhramara	bhramar	bhamba:	bhamarā	bee

It is not true that Nepal Bhāshā vocabulary exclusively contains Sanskrit loan words in the form of *Tatsam* and *Tadbhava*. Many examples of Non-Sanskrit words can be cited showing the link between Nepal Bhāshā and languages of Tibeto-Burman stock. A few examples are given here:

(17)	<u>Sanskrit</u>	<u>Nepali</u>	<u>Nepal Bhāshā</u>	<u>Gloss</u>
/a/	amla	amilo	pāū	sour taste
/k/	karkari	kānkro	tusi	cucumber
/g/	gitam	giita	mye	song
/t/	tushara	tusāro	chwāpu	frost
	tikta	tito	khāyu:	bitter
/d/	dantya	dānta	wā	teeth
/p/	pita	pahenlo	mhāsu	yellow
/b/	byāghra	bāgha	dhun	tiger
	bhaika	bhyāguṭā	byān	frog
/r/	raktam	rāto	hyāun	red
/n/	nila	nilo	wacu	blue
/s/	sweta	seto	tuyu	white

What is shown from all these Sanskrit loan words is that Nepal Bhāshā has a close contact with Sanskrit Pundits and their influence on Nepal Bhāshā is displayed in academic and scholarly writings. Some Prakrit forms are still in use in current Nepal Bhāshā along with some derivative forms. Due to heavy borrowing from Sanskrit and the influence of Prakrit forms, Nepal Bhāshā noun vocabulary has less contact with other Tibeto-Burman languages. It would be an interesting topic to verify Dolakhā vocabulary with Sanskrit, to come up with how much Sanskrit became a dominant language in conservative dialects. Many of the Sanskrit words verified here are from written texts. As Dolakhā still retains the oldest form of Nepal Bhāshā, it helps to verify the

cognate words with other cognate Tibeto-Burman languages.

4.1 Relationship between Nepal Bhāshā and English

The influence of English on other languages is a universal phenomenon. We also encounter a large number of English vocabulary in Nepal Bhāshā. Some examples of the direct borrowing of technological lexis are as follows:

(18)	Computer	Cable	Internet
	Telephone	Scanner	Television (TV)
	Box	Calender	Cup
	Frame	Post box	Parcel
	Tooth brush	Powder	Toilet

Besides these, some of the English words with C-l or l-C cluster require an epenthetic vowel [-i-] in Nepal Bhāshā.

(19)	<u>English</u>	<u>Nepal Bhāshā</u>
	class	[kilās]
	glass	[gilās]
	film	[philim]

Moreover, the words with the initial phoneme /s/ also require the epenthetic vowel [i-] in Nepal Bhāshā.

(20)	<u>English</u>	<u>Nepal Bhāshā</u>
	school	[iskul]
	stool	[istul]
	stove	[istobh]

This process is very common in most of the words from Sanskrit as well.

(21)	<u>Sanskrit</u>	<u>Nepal Bhāshā</u>	<u>Gloss</u>
	sthāna	isthān	Place
	stri	istri	Female person

An interesting occurrence in relation to Nepal Bhāshā and English was identified by Amātya(2000). He examined some English words and found that their initial sounds cognate with the same word in Nepal Bhāshā as listed below¹⁴ :

(22)	<u>Nepal Bhāshā</u>	<u>English</u>	<u>Gloss</u>
	/k/	[karnar]	corner
	/kū/	[korn]	corn
	/ka:ni/		

/j/	/jya/	[Ja:b]	job
/b/	/batā/	[baks]	box
	/bu:ba:/	[bi:n]	bean
/m/	/māka:/	[maNki]	monkey
	/manu:/	[maen]	man
/s/	/sa:/	[sāund]	sound
	/suka/	[striN]	string
/n/	/nakin/	[nel]	nail
	/hikka/	[hicap]	hiccup
/h/	/ho:/	[ho ^w l]	hole
/r/	/riti/	[rait]	rite

All of these noun words manifest some sort of relationship between two languages. It would be an interesting topic to investigate in detail the relationship between these two languages based on the cognate words. At this point further investigation is required to establish a firm argument on whether these words are directly influenced from the English or they entered through the influence of Sanskrit into Nepal Bhāsha in medial period of Indo-European languages. Because of the obvious influence of Indo Aryan languages on Nepal Bhāshā, the more extensive Tibeto-Burman influenced is shadowed. If more aspects on language link were studied rather than those based on verb inflectional pattern, there would be more evidence to support the Māhākirāt hypothesis (Driems1993).

Such a relationship with English is not only in the category of nouns but also in other types of words. In this connection, Amātya(2000) presents more examples from verbs and adjectives as follows:

(23) **Verbs:**

	<u>Nepal Bhāshā</u>	<u>English</u>	<u>Gloss</u>
/k/	/kochāla/	[kamplit]	complete
	/kochinu/	[kampakt]	compact
/p/	/phuta/	[finiS]	finish
/b/	/bekoye/	[bent]	bent
	/boekala/	[blu]	blew
/l/	/lidhane/	[li:n]	lean
	/lena/	[left]	left
/w/	/wona/	[went]	went
/s/	/suigu/	[seu]	sew

As we see, the initial segment of these words are cognate in both languages. If Nepal Bhāshā was not influenced by the Indo-Aryan languages we would not find this sort of relationship in words which are commonly used in both languages. Here also we cannot make a firm conclusion unless and until we examine the classical and old form of words from both languages. As far as adjectives are concerned, Amātya again finds more words that indicate relationship similar to those above¹⁵ :

(24) Adjectives:

	<u>Nepal Bhāshā</u>	<u>English</u>	<u>Gloss</u>
/k/	/kaka:/	[krast]	crust
/t/	/tadhi/	[ta:l]	tall(sthula)
	/taskan/	[tu mach]	too much
/p/	/phalachin/	[flānnel]	flannel
/b/	/bachhi/	[bāi monthly]	bi monthly
	/bichaye/	[bitwin]	between
	/bānlā/	[byutiful]	beautiful
/n/	/nhu gu/	[nyu:]	new
	/nāngā/	[neked]	naked
	/nhya/	[niar]	near
/l/	/lipā/	[leṭar]	later

In summary, it is true that a large portion of Nepal Bhāshā speakers are educated than are speakers of other Tibeto-Burman languages. Because of their higher level of education, there is a stronger influence on their native languages. Since Nepal Bhāshā speakers are obliged to learn non Tibeto-Burman languages, their native language is automatically influenced by the contact language. Hence its core linguistic features gradually disappear. This is clearly noticeable in the case of Nepal Bhāshā.

5.1 Morphological and Syntactic Influence of Indic Languages in Nepal Bhāshā

5.1.1 Viceversa Loan Words:

Until now we do not know whether the influence has been limited to borrowing vocabulary or if morphemic and syntactic structure have also been affected. In this section, I will present my argument that demonstrate the structural influence of Indic languages on Nepal Bhāshā. In addition, a discussion of features of Nepal Bhāshā that look different from standard forms and similar to forms of Indic languages will also be presented.

Currently, many Newars excessively use Nepali language while using Nepal Bhāshā as little as possible. In some cases, parents use Nepal Bhāshā loan words while speaking Nepali to their children. A couple of examples are given here:

(25) Arule **hārān** bhancha hai !
Other-Erg mean person say-impf-Voc
Others say you are a mean person.

(26) bābu **cici** khāne ?
little boy meat eat-Imperfective
Oh dear would you like to eat some meat?

Equivalent forms of the words /hārān/ and /cici/ are not available in Nepali. Hence they need to borrow from Nepal Bhāshā. Both of these words indicate a precise and exact meaning in a certain situation. Similarly, there are many Nepal Bhāshā words used by native Newars when they speak Nepali¹⁶.

5.1.2 Structural Borrowing:

In this section, I intend to present some preliminary points of deviation by showing a Tibeto-Burman feature with Indo-Aryan structure, especially focussing on case, gender, classifier, and number in Nepal Bhāshā.

5.1.2.1 Use of Case Marks:

Nepal Bhāshā manifests simple case suffixes as a distinctive feature. Each case marking suffix undergoes phonological change that is conditioned by the form of nominals. Due to excessive use of Nepali, young Newar speakers prefer a similar pattern of case marks in Nepal Bhāshā as they appear in Nepali. How do the case marks differ in Nepali and Nepal Bhāshā? Do they undergo phonetic change or are they stable in usage? The forms of case marking suffixes in both languages are given below:

(27)	<u>Nepali</u>	<u>Nepal Bhāshā</u>	<u>Grammatical Meaning</u>
	-le	/-nā/	Ergative/ agentive
	-lāi	/-yāta/	Obsolutive/objective
	-le	/-na/	Instrumental
	-(k)o/ā/ i	/-yā-gu, -mha/	Genitive
	-dekhi	/-nisē/	Ablative
	-bāta	/-nan/	Ablative
	-mā	/-sā/	Locative
	-sanga	/-nāpa/	Associative
	-samma	/-taka/	Limitative

The Nepal Bhāshā case marking morphemes undergo phonological change and create following allomorphs:

(28)		<u>Allomorphs</u>
Ergative	/-nā/----->	[-sā], [-ā] [-V]
Instrumental	/-nā/----->	[-V]
Obsolutive	/-yāta/----->	[-ita], [-ta]
Locative	/-sa/----->	[-laye],[-khaye],[-e],[-i], [-ae]
Genitive	/yā-gu/mha/ -->	[yāu, yāma]

Joshi, S.K.(1988) illustrates some examples of phonemic changes in modern period that mainly focus on variants of vowel and consonant usage in the new generation of Newars. They also show variant forms of case marks that simply use one form on all occasions without

conditioning to the form of nominals. Some of the examples below are taken from a letter¹⁷ written by a growing young Newar speakers Subin and Reena :

(29)	<u>Used form</u>	<u>Standard form</u>	<u>Nepali Form</u>	<u>Grammatical Meaning</u>
	bā-na	bā-nā	bā-le	Ergative
	bhimā pi-ta	bhimā-pin-ta	bhimā-haru-lāi	Obsolutive
	āshirbāda na	āshirbādā	āshirbād-le	Instrumental
	phone laye	phone-ae	phone-mā	Locative
	homes-laye	homes- ae	homes mā	„
	chapin-au	chapin-igu	timi-haru-ko	Genitive
	chē-u	chē-yāgu	ghar-ko	„

All of the casemarking suffixes used in the sample text have been directly influenced from the structure of the Nepali language. They simply replace the case mark as they are used in Nepali. This needs to be verified with more attested data to draw a firm conclusion.

5.1. 2 .2 Use of Plural Marker:

Nepal Bhāsā manifests two types of plural markers /-ta/ and /-pī/¹⁸. The first being a default one and the other is strictly used only for pronouns, kinship terms and inclusive form of proper names. In the text letter mentioned above, only /-pī/ is used where /-ta/ was supposed to have been used as shown in the following (Newāmi 1997) examples:

(30)	<u>Used form</u>	<u>Standard form</u>	<u>Nepali Form</u>	<u>Gloss</u>
	dāi kehē-pī	dāi kehē-pī	dāi bahini-haru	brother sisters
	bhul pin	bhul -ta	bhul-haru	mistakes
	ciṭṭhi pin	ciṭṭhi-ta	ciṭṭhi-haru	letters

From these examples it can be predicted that being a Newar speaker is likely to be influenced in the structure of Nepal Bhāshā by frequent usage of another language. In this case, the speaker used Nepali more than Nepal Bhāshā. Hence, his knowledge of Nepal Bhāshā is limited which makes him prone to model in his native language after Nepali. In the above examples, the retroflex /ṭ/ consonant is not phonemic in Nepal Bhāshā, but the speaker is not aware of this and directly copies Nepali structure. Therefore, the Nepali structure of using suffix /-haru/ as a plural marker has substituted the process of pluralizing the nominals and ignored the core feature of Nepal Bhāshā.

5.1. 2 .3 Use of Gender Marker:

In Nepal Bhāshā, generally a noun is unmarked to indicate male gender and the prefix / mā-/ is used to mark the feminine form. In particular cases, the gender difference is coded with /bā-/ and /mā-/ prefixes:

(31)	<u>Nepal Bhāshā</u>	<u>Nepali</u>	<u>Gloss</u>
	khā	kukhurā	chicken
	mā-khā	pothi	hen
	gonga	bhale	rooster
	sala	ghoḍā	horse
	mā-sala	pothi ghoḍā	mare
	kisi	hātti	elephant
	mā-kisi	pothi-hātti	female
	bā-kisi	bhāle hātti	male
	mha	jiu	body
	ba:mha	bubā	father
	mā:-mha	āmā	mother

In addition, the suffix /-ni/ is also used to indicate the professional jobs and caste names for feminine nouns in Nepal Bhāshā as follows:

(32)	<u>Male</u>	<u>Female</u>	<u>Gloss</u>
	dhobyā	dhobyā-ni	washer
	sārki	sārki-ni	shoemaker
	syasya:	syasya-ni	Shrestha caste
	nurse	nurse-ni	nurse
	sāhu	sāhu-ni	merchant

Similarly, the suffix /-ni/ is used to code the feminine form of gender in Nepali also in addition to other rules of gender difference.

(33)	<u>Male</u>	<u>Female</u>	<u>Gloss</u>
	kavi	kaviyatri	poet
	netā	netri	leader
	gyāpu	gyāpuni	farmer
	pulis	pulis-ni	police cop
	māstar	māstar-ni	teacher

All these examples of gender difference using suffix /-ni/ are common in both Nepali and Nepal Bhāshā. It is not clear yet whether the suffix /-ni/ is original to Nepal Bhāshā or Nepali. It is still open for further verification whether this morpheme is as an ancient or classical form of Nepali.

5.1.2.4 Use of Classifier:

Nepal Bhāshā is a numeral classifier language that consists of two major classifiers /-mha/ and /-gu/ to differentiate nouns into animate and inanimate category. The inanimate classifier further distinguishes into shape, size and appearance of the entity¹⁹. Nepali does not feature the

use of classifiers as Nepal Bhāshā does. However, Nepali numerals are suffixed with /-janā/ and /-watā/ --> [-otā], [-uṭā], [-ṭā] to distinguish between human and non-human nouns including all inanimate objects.

(34)	<u>Nepal Bhāshā</u>	<u>Nepali</u>	<u>Gloss</u>	<u>Semantics</u>
a.	cha-mha misā	ek janā āimāi	a woman	animate
b.	swa-mha jhagah	tin-watā carā-haru	three birds	animate
c.	ni-gu mec	dui-watā mec	two chairs	dimensional
d.	cha-pa mari	ek watā roṭi	a slice of bread	flat
e.	cha-pā: kamij	ek watā kamij	a shirt	sheet
f.	pyan-ga guccā	cār-watā guccā	four marbles	round object

This feature of classifier system in Nepal Bhāshā is becoming less important for young Newar speakers. They simplify all inanimate classifiers with /-gu/ as a replacement of the suffix /-watā/ from Nepali without differentiating the nouns into animate and inanimate categories. Only human nouns are coded with /-mha/--> [-ma]²⁰, all others with /-gu/ --> [-u] Therefore, it may shadow Nepal Bhāshā as a classifier free language, which may eventually lead to the loss of an important feature of Tibeto-Burman languages. The classifiers /-mha/, /-gu/, /-pā/ and /-pā:/ in b, c, d, e and f, are replaced with /-gu/ by young Newar speakers as a direct influence of Nepali.

To summarize, from all the above examples it can be confirmed that the current structure of Nepal Bhāshā has been widely dominated by Nepali, thereby losing some important and common morphological features of Tibeto-Burman languages. It will be difficult to correct unless a preventive step is formulated for young Newar speakers soon.

6.1 Structure of Syntactic Domination:

Since Nepali has influenced Nepal Bhāshā in many ways on morphemic level, it is reasonable to assume its influence on the syntactic structure also. In order to test this assumption I have analysed some sample letters written in Nepal Bhāshā by young Newar speakers Reena (12 years) and Subin (18 years), and a free translation of an English story into Nepal Bhāshā²¹ by Nilah (8 years) and Saurav (14 years). I found a series of striking examples in letters and translated text. A few interesting constructions are given here for analysis:

(35) WNB: [ciṭhi wagu ni] [ji-ta sike khushi jul-a] (*Reena's letter*)

Gloss: letter come-NOM- reason 1sg-DAT INST happy happen-PD

Trans: I became happy receiving a letter.

Nepali: ciṭhi ā-eko-le ma-lāi khushi lāg-yo.

Letter come-PERF reason 1sg-DAT happy attach-3past

(36) WNB: [tho ciṭhi newā nā cwā ha-yā-gu ni] [bhul-pī chu-gu ni-gu pihā wai]

(Subin's Letter NV 1: 68)

Gloss: This letter NB-INST write send-PC-NOM reason mistake-Pl one-Cl
two-Cl out come-NPD

Trans: Because, I wrote this letter in Newar there may be one or two mistakes.

Nepali: yo ciṭhi Newar-mā lekh-eko-le bhul-haru eu-ṭā dui-ṭā niskan-chha.

Gloss: this letter Newar-in write-PERF-reason mistake-Pl ek-Suf two-Suf come out 3sg-
Npast

In the above two examples 35 and 36 the construction of Nepal Bhāshā sentences are clearly a transfer of Nepali structure. Both of them replaced words from Nepali to Nepal Bhāshā. They know how to write Nepali from school but they do not have formal instruction on writing Nepal Bhāshā. Therefore they simply translated the text as in Nepali into Nepal Bhāshā. In these two sentences the first clauses are the cause of co-relation to the second clause. They are similar to /gulin/ construction (Malla 1986) in Kathmandu Nepal Bhāshā. In Reena's example the second clause [ji-ta sike khushi jul-a] can be replaced with nominative subject /ji khushi juyā/ instead of the dative subject. This substitution seems more natural to me as a native speaker. In Nepali, however, [ma khushi bhayen] seems not quite natural. Therefore Reena prefers to transfer the Nepali form of construction into Nepal Bhāshā.

Similarly, in the case of Subin, the second clause [bhul-pin chu-gu ni-gu pihā wai] can be replaced with /bhul-ta cha-gu ni-gu daye phu/ which is more natural. But replacement of this construction in Nepali [bhul-haru eu-ṭā dui-ṭā huna sakcha] seems kind of acceptable with less priority in this particular context.

Besides these, some examples of translated text from English into Nepal Bhāshā by Nilah and Saurav can also be attested. A sample of translated paragraph in 37 and their translation of bold face sentences in 38 and 39 is taken from a very short and popular children story of the Emperor Akbar and his minister Birble.

(37) "Often, the Emperor and Birble used to move about in the town at night in disguise. One night while strolling in the manner, they came across an odd sight. **A fair, beautiful woman was loving kissing and hugging her dark, ugly, and dirty child.**" (Newāmi 98)

Both of them translated the above bold-face sentence as follows:

(38) Nilah: imi-sā bālā-mha mayeju-nā cha-ma bā-ma-lāma wa phohar-mha macā-yāta
3pl-Erg beautiful-Cl girl-Erg one-Cl. beautiful-NEG- Cl and dirty-Cl child-Obs
māyā yānā cōgu khan-a.

love do-NF stay-NOM see-PD

Nepali: uni-haru-le rāmri āimāi-le ek-janā na-rāmro ra ghinlāgdo baccā-lāi

3-pl-Erg beautiful-Cl girl-Erg one-Cl. beautiful-NEG- Cl and dirty-Cl child-Obs
māyā gari raheko dekh-e.

love do-NF stay-NOM see-3Pl/PERF

- (39) Saurav: rājā nā cāhī cha-u mā-nā cha-u kāeta cuppā yānā cwōu khana.
king-ERG TOP one-Cl mother-ERG one-CL son-OBS kiss do-NF stay see-PC
Nepali: rājā-le cāhī euṭā āmā-le euṭā choro lāi cummā gari raheko dekhe.
king-ERG TOP one-SUF mother-ERG son-ABS kiss do-NF stay-PERF see-3pl
Past.

Sentences 38 and 39 also demonstrate a similar type of transfer from Nepali. Nilah's Nepal Bhāsā is more comprehensible than Saurav's. She has a problem with assimilating morphological phrases. Saurav's examples show more difficulty with conjugating Nepal Bhāshā words. Hence, he just uses Nepali words wherever he needed. Nilah and Saurav speak Nepali with their parents and playmates, whereas Reena and Subin speak Nepal Bhāshā with their parents and Nepali with their playmates. The sentences they have chosen are simply a transfer of the most used language i.e. Nepali.

In summary, what is common in these examples of Nepal Bhāshā sentences is that the percentage of native vocabulary, knowledge of morphemic structure and cohesiveness of syntactic feature are disappearing from the young Newar speakers. More examples are necessary to address the other aspects of the syntactic properties. This will be another topic in a study of influences from non-Tibeto-Burman languages. At present my study lacks the samples of free discourse materials from young Newar speakers for further analysis of the syntactic influence of non Tibeto-Burman languages in Nepal Bhāshā.

However, the available printed materials from current newspapers, journals and internet versions of news published in Nepal Bhāshā do not reveal accurate syntactic domination. Many of these text materials are written by well-known native speakers. Their text materials are very incomprehensible to most of the young Newar speakers, except to the Newars who have been involved in the preservationalist activities and to those who have benefited from the formal education in Nepal Bhāshā in high schools and colleges. The counting of non native vocabulary in printed text materials is illustrated in the table -1.

Table -1
Text Count

Title	Source	Date	Total words	NTB Word	Percentage
Shankhadhar	MKB	3/'01	132	41	31.0
Newāh Television	MKB	1/'01	152	58	38.1
Pāras kānda	ST	8/'00	272	63	23.1
Māwo bādi	STI	5/'01	168	42	25.0
twā: kha:	HD	12/'98	281	21	7.4
nhu dā	YD	9/'98	207	40	17.6
Chaturmisā	Cl	1746	242	51	21.0
Swasthāni kathā	Cl	1661	541	148	27.3
Tantrākyaṇa	Cl	1518	204	39	19.1
Letter	S	1997	207	37	17.8
Letter	R	1990	76	17	22.3

* Manka Khalah Bulletin (MKB), Sandhya Times Daily (ST) Sandhya Times Internet Version (STI), Yomari Digest (YD) Hisi Digest (HD) Letter-S (Subin) Letter-R (Reena), Classical (Cl.)

From the table, it is obvious that 23-38 percent of current Nepal Bhāshā in print consists of non-Newar words from Nepali, Sanskrit and English. If the English influence is mainly for technically related subjects, the Sanskrit and Nepali influence is taking place as a major source of borrowing in other domains. If the borrowing of Sanskrit words predominantly occurred as a main source of building up the Nepal Bhāshā lexicon from the very beginning of its contact with most of the literarily advanced languages, borrowing from Nepali would be unnecessary.

A significant example of current text is an editorial essay 'twā: kha: cuka makhu', 'a matter of locality, not a courtyard' from a digest type of journal 'Hisi' 'Cute'. The editor Ramesh Kaji Sthapit is a well known story writer. He uses only 7.4 percent non-newar words for his writings. If his style of writing is considered a standard example of Nepal Bhāshā text, it can be used as the material for comparative study with other Tibeto-Burman languages. However, the printed materials are incomprehensible to a large number of young Newar speakers. Hence, Nepal Bhāshā publications face poor promotional marketing and frequently plunge into the problem of discontinuation. In this situation, the influence of dominating languages from education and social factors may result in the loss of one of the well-known and popular Tibeto-Burman languages in Nepal.

In addition, the influence of non-Newar vocabulary in classical texts of three different periods given in the above Table-1 also indicates that the classical Nepal Bhāshā consists of 19-21 percent loan words²². Therefore, it is not a new phenomenon for Nepal Bhāshā to be influenced by non-Newar vocabulary. In fact, there is a trend of influence from Indo-Aryan into Tibeto-Burman languages in both the ancient and modern periods. However, at present we come across only a couple of examples of languages (Nepal Bhāshā and Thangmi, and probably Tibetan) that have been under the shadow of Indo-Aryan features. The conclusive features found in this study are summarized here.

Lexical Influence:

1. Excessive borrowing of technological vocabulary from English and spiritually related vocabulary from Sanskrit.
2. Results of text counts show that one fourth of non-Newar words are used in almost all the texts written by native people including editors, teachers and general speakers.
3. Some idiosyncratic Nepal Bhāshā words are used by Newars when they speak Nepali with their children.

Phonemic:

1. The phonemic distinction between long and short vowels is not very important to modern speakers.
2. Phonemicity of the nasalization feature is gradually becoming less important in young Newar speakers.
3. The aspirated sonorant phonemes are disappearing .
4. The dental and retroflex /t/ series of phonemes are entering into written and spoken Nepal Bhāshā.
5. Dental, retroflex and palatal /s/ are appearing in written Nepal Bhāshā.

Morphemic:

1. the feminine gender marker /-ni/ is common in both Nepali and Nepal Bhāshā eg..

doctor- doctor-ni, jyapu-jyapu-ni

2. Newar speakers are gradually paying less attention to using specific classifiers based on size and shape of the object and use the default inanimate /-gu/ in most cases.
3. The ergative marker /-nã/ is appearing as replacement of the Nepali /-le/ without forming the allomorphic variation of /-na/.
4. The locative case marker /-laye/ is used as replacement of Nepali /mã/ in all cases without forming allomorphs and without undergoing phonological assimilation.
5. Plural marker /-pĩ/ is used in all cases as the replacement of /-haru/ from Nepali and the default one /-ta/ is disappearing.

Syntactic Domination:

1. Clear transfer of syntactic construction from Nepali into Nepal Bhāshā among the young Newar speakers.
2. The Nepali topical particle /cāhin/ and conjunctive particles /ani/ and /ra/ are used very often by native Newars.

General Observation:

1. The higher the interaction with non-Newar speakers, the less likely the speaker is to maintain the native language at home and outside.
2. The higher the education, the less likely the speaker is to use Nepal Bhāshā .
3. Nepal Bhāshā is taking its place as a second language among many young Newars.
4. The reading of Nepal Bhāshā text is very very difficult for young Newar speakers.

In summary, many Newar children have begun to give up speaking Nepal Bhāshā because specific features of the Nepal Bhāshā sound system are incomprehensible for them. Similarly, many Newar youths are too shy to talk in Nepal Bhāshā because they are afraid of not finding a good job in the market. Therefore, Newar adults feel proud of seeing their children speaking languages other than Nepal Bhāshā.

Under these circumstances, when a group of active protesters asks for help to protect Nepal Bhāshā and not to give up speaking their own language, they are considered conservatives, anti-government, and anti-modern. There are many factors that hinder the preservation of Nepal Bhāshā. On the one hand, speaking one's own language does not promote an individual's financial situation. On the other hand the government does not emphasize the protection of ethnic Tibeto-Burman languages which are approaching extinction. The development of education in human society is rapidly changing the whole world in many ways for the better life. Regrettably, with the growth of modern education less attention is being given to one's own ethnic language. This is a dilemma for the speakers of Nepal Bhāshā in Nepal.

Further study is necessary to examine how much Tibeto-Burman languages have been influenced by the Indo-Aryan features and how far they have deviated from the core feature of Tibeto-Burman languages. Is it really a good sign for the Tibeto-Burmanist to broaden their scope of studies? How can we address this kind of flow of unwanted guest words into TB languages? Finding remedies for this kind of virus may protect the core and heart of the Tibeto-Burman languages from infection. I believe this is also an issue among the Tibeto-Burmanists. It should not be ignored in search of Proto forms of any language spoken in Nepal. We should give serious thought on it also.

Notes:

1. I sincerely thank Dr. Devendra Amatya , North Carolina State Unversity, for his insight in the relationship between Nepal Bhāshā and English, as presented in a preliminary report on *Dabuu journal* (2000) . It inspired me to investigate further details to answer his question “ Is there a Relationship between Nepal Bhāshā and English ? ” This paper is an outcome of his curiosity for which I acknowledge his effort to bring the issue to light for further discussion and for his comments on earlier version of this paper. I am also grateful to Prof. Bruce Owen, Wheaton College for his insightful comment. I am also indebted to Prof. Carol Genetti for giving me opportunity to present the earlier version of this paper in the Workshop on Tibeto-Burman Languages, University of California, Santa Barbara July 27-29, 2001.

2. Nepalese government has millions of rupees for the development of Nepali language; however, there is no revenue for Nepal Bhāshā to promote preservational activities.

3. From Hargreaves and Tamot (1986)

<u>Nepal Bhāshā</u>	<u>Nepali</u>	<u>Sanskrit.</u>	<u>*PTB</u>
dhula--> dhu:	dhulo	dhulih	*dul / tul
thāsa --> thāye	thāun	sthāna	
taye	thāpnu	sthāptaya	*ta

They have pointed out that in any case the importance of both Tibeto-Burman and Indo-Aryan connection in study of Newar diachrony should not be undermined.

4. The first and second symposium were organized by Himalayan Languages Project under the guidance of Prof. George van Driem in 1995 and 1996 .

5. Tibeto-Burman languages have been named after the non Tibeto-Burman forms. eg. Badāgāunle, Newari, Pahari, Mugali etc.

6. Study on influence of Hindi and Pali in Nepal Bhāshā is not included in the present paper.

7. A large number of Newars living out side of Kathmandu Valley do not speak Nepal Bhāshā at all.

8. Many of these words are used even in my own in-law -familis and friends.

9. Many of these localities are changed into Nepali names. For more details see (Shakya 1998).

10. The writer of this paper has met many Newar students studying in US Colleges and Universities. Many of them have finished their education in boarding High schools. They understand Nepal Bhāshā to some extent but never use it at all either with schoolmates or at home with family members.

11. A partial list of unnecessarily borrowed English words presented by Tamrakar is given here.

/cook/	‘suwā’	/drinks/	‘twōsā’	/busy/	‘limalā’
/plate/	‘rikāpi’	/chiken/	‘khāyā lā’		

12. Recently Turin (2000) has presented some cognate words from Thangmi and classical Nepal Bhāshā showing a possible source of Sanskrit influence into the Thangmi language.

13. He has attested all the words given in his list from Amarakosh dated 501 that is preserved in the National Archive, and the Amarakosh(506) from Cambridge university library cited in August Conrady’s collection of Sanskrit-Nepal Bhāshā dictionary 808 (1893)

14. For more words see Amatya 2000

15. The word ‘ dust’ is cognate in many languages such as Indo-European: ‘dhuzi’, skt. ‘dhulih’, Nep.. dhulo, N.Bhāshā: dhu:(Hargreaves and Tamot 1985).

16. An additional list of similar loan words used by Nepali speaking Newars is given here.

/samay baji/	‘traditional food’	/yamari/	‘a kind of food’	/wa: pāpā/	‘beans patty’,
/mamacā/	‘dumplings	/choclā/	‘meat salad’	/kacilā/	‘special dish’,
/caṭāmari/	‘pan fried cake				

It is interesting to note that the Newars who have already adopted Nepali as their mother tongue use following the Nepal Bhāshā kinship terms to present their identity of being Newar in Eastern Nepal, Darjeeling , Kalipmong and Sikkim regions..

/tatā/	‘elder siter’	/pāju/	‘maternal uncle’	/ajā/	‘grand father’
/nini/	‘father’s Sister’	/maleju/	‘maternal aunt’	/aji/	‘grand mother’

17. see Newami 1997 for the text of the letter.

18. Dolakha /-pen/, Dhulikhel /-pang/, Bhaktapur /pū/

19. For details on classifier see Hale, A. and I. Shresthacharya 1972, Bhaskarrao and Joshi 1984, Shakya (1997)

20. This classifier is almost lost in Saurav’s speech (Newami 1998)

21. See Newāh Vijnān -2 page 68 for the text.

22. Malla has claimed higher percentage in the DCN (2000)

The Question of Janajāti*

Malla K. Sundar
Kathmandu, Nepal

While many earlier speakers have discussed Janajāti, they have not broached the most crucial issue, which is whether or not Newars ought to be included under this rubric. To answer this question, we need to understand the category of "Janajāti" as it is used in Nepal today. To understand the contemporary use of Janajāti, one could turn to the UNO's encyclopedia entry or to the *Vrihat Śabdakoś* published by the Royal Nepal Academy. Yet, because these sources do not contextualize the concept in the history and culture of Nepal, they can only give partial answers. So if we are to understand Janajāti as it relates to Newars, we need to examine the concept in both its historical perspective and contemporary usage.

In 888 NS., before king Prithvīnarayan Shah invaded the ancient Nepal Valley, there were many independent Kingdoms in Nepal, such as Khasan, Kirants, and Mājha Kirānt. These kingdoms evolved into two opposing groups. On one side are the Śāsaks, who work closely with the Śāhā kings. They include such peoples as the Bāhuns, Chhetris, Thāpās, and Basnets. And on the other are the Śāsits, which include the Rai, Limbu, Rājansi, Tāmāng, Sherpā and Newars.

The asymmetrical power relations between these two groups are the main cause of social, cultural, racial, and religious dispute in Nepal. In modern Nepal, the Śāsaks' domination of the Śāsits has been legitimized by Janga Bahadur's *Muluki Ain* (Court of Law), and imposed by the Pachāyat system of government. The *Muluki Ain* categorized people as either

Tāgādhāri or Matwāli. Tāgādhāris were said to wear the *janāi* (sacred string) and were considered to be part of the higher Brāhman varna, while on the other hand the Matawālis, who drink alcohol and eat buffalo, were placed in the lower Vaisya and Sudra varna. These asymmetrical positions were enforced by Prime Minister Chandra Shamsheer and deeply rooted in the Pachāyat system.

The Janajāti movement began in Shrāwan 2036 (1979) during a multi-lingual public gathering. The Newars initiated the struggle, not just for themselves but for other dominated groups such as the Magar, Rai, Gurung, Tāmāng, and Thakāli. Yet, Newars cannot win this struggle working solely by themselves. All ethnic groups must work together to achieve linguistic equality and the right to practice one's own culture and ethnic traditions. The goals of the Janajāti movement were expressed for the first time in Nepal by Bhasha Mankā khalah. Under the chairmanship of Ramananda Prashad Singh, the Nepal Mātribhāshā Parishad (The Council for Indigenous Languages in Nepal) was formed. And I, as the Secretary of the Council made sure that equal representation on the Council was given to Rai, Limbu, Tāmāng, Magars, and all others. Yet the council did not remain active. Hence under the chairmanship of Mr. Sitaram Tāmāng, a Sarva Jātiya Adhikār Manch (A Forum for Ethnic Rights) was formed. Under the auspices of this Forum several press conferences and symposia were held on the problems of ethnic languages and ethnic rights. By the end of BS 2046

(1989AD), the forum came to be known as the Janajāti Māhā Sangha (The National Committee for Ethnic Groups). As this short history shows, the concept of "Janajāti" developed in Nepal as a way of demanding rights for all ethnic groups. Equal rights does not apply only to the "Chuche Nākh" (pointed nose people), nor does it apply only to "Chepte Nākh" (flat nose peoples). It applies to all people. In short, the question of Janajāti refers to any movement for equal rights. How is "Janajāti" used today? In Nepal, the exact meaning may differ from other countries. Some people translate Janajāti into English as "race," "tribe," "clan" or "ethnic group." And in Nepal some people may use it to mean backward classes and what is known in India as "scheduled castes." Yet in fact, Janajāti translates into American English as "nationalities." Similarly, the Janajāti Māhā Sangh is often translated as the "Federation of Nationalities." Therefore, the best meaning of the word Janajāti is "nationalities." Even His Majesty's Government's (HMG's) special commission for Janajāti is named "Rātriya Janajāti Bikās Samiti". (The National Janajāti Development Committee). The commission has recently published a book titled *Nepālkā Janajāti Haru* which adopts none of the words "race," "scheduled castes," "backward class," or "ethnic group," but instead refers to the Janajāti as "Nepalese nationalities."

Therefore, it is clear that Janajāti means nationality (Rāstriyatā, Janajātiyatā). Yet, are Newars national or alien? We lost our right to decide this questions when King Prithivi Narayan Shah invaded the Nepal Valley. He took away our right to use our own language, to practice our own religion, to preserve our own cultural heritage. He stripped us of our ethnic rights.

What are Newars? Do they have a place in *Newāh Vijñāna -4*

Nepal or not? If we are demanding our ethnic rights, should we be a part of the Janajāti? Excluding Newars from the Janajāti movement not only takes away rights, but strips us of our own ethnic identity. In my opinion it is not a matter of pride whether or not the His Majesty's Government (HMG) includes Newars in the list of Janajāti. Nor is merely that if Newars are included they may nominate a person for the Janajāti Academy and that they will be allotted a revenue of 10-20 million rupees. Newars do not have a choice; they are part of Janajāti movement because they do not belong to the Śāsak group. They are not Bahuns or Chetris.

Since the movement claims the restoration of ethnic rights, why are many trying to exclude Newars from the movement? We must be aware of a conspiracy. It is a repetition of history. Whenever Newars try to claim for themselves their given rights, it is always Newars who stop it. When news programs in Nepal Bhasha were rejected by Radio Nepal, there was a Newar secretary at the Department of Communication. When participants were beaten during a program organized by the Nepal Bhasha Mankā khalah observing the birthday of the great poet Siddhi Das Amatya, there was a Newar Prime Minister.

A few years ago, on the basis of report submitted by Dr. Santa Bahadur Gurung and Dr. Krishna Bhattachan, the Nepalese government had included Newars on the list of sixty-one National Janajātis of Nepal. They had submitted the report after conducting extensive field work and consulting with several scholars from Eastern, Western and Far-western regions of Nepal. They have also contacted the National Forum for Newars, the *Newāh De Dabuu*, which recommended that they include the Newars on the list of National janajāti. The crucial point is this: When the

report was brought up in the meeting of the cabinet ministers in the chairmanship of Prime Minister Girija Prasad Koirala, a dispute of confusion appeared. The prime minister asked for historical, cultural, and social data to consider whether are not Newars are Janajāti. Prof. Manik Lal Shrestha, Hon. Padma Ratna Tuladhar, and Dr. Panta, Dr. Bhattachan supplied proof indicating that Newars were Janajāti. All the cabinet members, including Minister Prakash Man Singh and and Minister Omkar Shrestha, were convinced that Newars were Janajāti. Finally, the report was published in the 'Nepal Rajpatra (The National Gazette).

The Nepal Bhasha Mankā Khalah is the organization which leads the Newar community. It is a member of the Janajāti Māhā Sangh" (the Federation of National Janajāti). Yet apparently, on the basis of an appeal submitted by so-called Newar society, Newars were deleted from the list of Janajāti without consulting the existing organization. HMG has decided to delete the Newars from the list of Janajāti merely on the basis of report registered by two appointed Newar MPs. The two appointed Newar MP's are supposed to represent the interests of Newars. Yet none of the previously contacted Newar organizations or scholars were consulted.

When anti-Newar activities occur there often seem to be Newars involved in supporting the events. For instance, in the year 2029 (1972) a delegation from the Newar community, including Mr. Satya Mohan Joshi, asked for the king's audience in the royal palace. They proposed that the language of Newars be called by Nepal Bhasha instead of Newari. At that time Tribhuvan University (TU) had issued a document arguing against the use of the term "Nepal Bhasha," because of possible confusion with the Nepali language. Since then, TU

started using the term "Newari" for the language of Newars. Among the members of the delegation a designated member of the Chwosā Pāsā (Nepal Bhasha Literary Society) was also there. After receiving audience with the King he started accepting "Newari" instead of Nepal Bhasha.

Often when Newars try to unite, Newars also help divide. For instance, although the National Convention of Newars held in 1995 was a glorious event, the same group has been discouraged from meeting again. Similarly, when the Nepali Supreme Court issued the writ forbidding the use of Nepal Bhasha in local bodies, some Newars published fliers against the outbreak of protest on the Supreme court issue. An unseen force becomes active when ever Newars try to unite. It has splintered many of Newar social bodies. Yet who benefits as long as Newars are divided?

To preserve our right of being Newars, we need to claim Janajāti status. On the basis of ten major agendas established by the National Janajāti Development Commission, the issue of political influence is the most important one for all. On the one hand the people who are in the Commission claim that the Newars play a significant role in political change in Nepal. It is true that the late Newar leader, Ganesh Man Singh, played a important role in the 1950 and 1990 democratic movements. Among four martyrs, three of them belonged to the Newar community. In 1990, when there was shooting in front of the Royal Palace, many young Newars were in the front lines. They gave their lives for the sake of the democratic movement.

Yet, Newars have gotten no real gain for their sacrifice. As Mr. Bal Krishna Mabuhang, the Secretary of the 'Janajāti Māhā Sangha, said, Newars are treated like a kept women. Politicians enjoy their contribution but give

nothing in return. And when Newars demand proper appreciation, the politicians ignore it. Politically, the ruling group has ignored the sacrifices of Mr. Ganesh Man Singh and all other Newar martyrs.

If Newars play a significant role in Nepalese politics, why don't they demand rights for Newars? For instance, when Mr. Tirtha Man Shakya was in the chief secretary why didn't he extend the use of Nepal Bhasha to local development authorities? And why didn't Mr. Pasupati Maharjan, who has been in the appropriate government office, engage in activities benefiting the welfare of Newars? Neither could demand rights for Newars, because both were mere puppets. They did not really have the power to make decisions. Similarly, Marich Man Singh, Ganesh Man Singh and Prakash Man Singh are powerless. This is why the Supreme Court banned Nepal Bhasha. This is why we hardly hear from the Ministry of Communication regarding the festivals of Janajāti peoples, whereas we hear endlessly about Teej and Rishi Panchami.

In order to preserve the cultural heritage of Janajāti, we must claim our political rights. Otherwise we will vanish as a people. The question of Janajāti is neither a question of backward classes, nor of race. It is question of equality. If we need to preserve our right we must identify ourselves as Janajāti. After the formation of the Janajāti Mahā Sangh in 1990, it has become a tradition to include Janajāti issues in elections. It also became a

part of ninth Five-year Plan to provide rights to Janajāti peoples. If we claim that we are not part of it, we will loose our status as Janajāti. Moreover, we will be denying a section of the budget allotted by the five-year plan to develop Janajāti issues.

Are Newars Janajāti? Some of us say yes. We claim the right to speak our language. We demand radio programs in ethnic languages. We demand publication of Nepal Bhasha books. And we claim the right for political quotas and the administrative use of our mother tongue. On the other hand some Newars claim that we are not Janajāti. The two sides of the questions are in contradiction. It reminds me of the proverb that describes two animals who fight at feeding time. We pick disputes when there is enough food in the bowl for everyone. If we want to maintain the status quo, I can only remain silent. Yet if we want to be part of the 21st century, we must struggle for both social and political multiculturalism. We live in a pluralistic age. In this multi-cultural age, if we claim we are not Janajāti, we might be considered foolish. If we do not demand equality of language, ethnicity, and national identity, we will remain the servants of the ruling Bāhuns and Chhetries.

(*This article is translated from the writer's paper submitted in the symposium on 'Whether the Newars are janajāti or not' organized by *Newāḥ Rāstriya Andolana*. The original article '*Newāta jana jāti kha makhu*' was published in *Newāḥ* journal 2000 in Nepal Bhasha.)

Rethinking of Newar Verb Conjugations

Kazuyuki Kiryu

Mimasaka Women's College, Japan

This presentation aims to consider the Newar verb conjugation in conjunction with tense, aspect modality and negation, discussing two sub topics. First, tense distinction expressed by the verb conjugation is discussed. The previous works take past vs. non-past distinction for granted. The point to ponder here is whether the dichotomy, past vs. non-past, is valid. This labeling is rejected on the following grounds:

- 1) The non-past forms cannot be used to refer to the present although the name suggests they can.
- 2) Stative form is also subject to tense distinction, expressing only past and present state. Future state must be expressed by non-past form.
- 3) Some aspectual auxiliary verbs in the past form refer to present, as well as past.
- 4) Counterfactual statements are expressed only by non-past forms.

These facts suggest that non-future vs. future distinction is more valid in characterizing Newar tense, which in turn suggests that it is based on the modality feature, realis vs. irrealis, and that Newar is a mood-prominent language in the sense of Bhat (1999).

This presentation will also discuss aspectual

distinctions encoded by verb conjugation, that is, evidential and stative. No past research has dealt with the meaning contrast between eventive and stative in a serious way. It will be argued that verb conjugations are basically divided into eventive stative, the contrast observed in non evidential subjects. It will be reported that the use of stative form to refer to a specific past event, not habitual, in a finite affirmative sentence is possible, and it will be argued that there is a semantic contrast between eventive and stative based on specificity. For example, Ram tibhi; swa: laa ? is a simple question to ask if Ram watched TV, whereas Ram tibhi swala laa ? is used if the speaker presupposes that Ram watched TV and tries to confirm his/her thought. Also it will be argued that the negation of these two forms gives rise to a meaning difference: the negation of eventive form expresses an establishment of the opposite state expressed by the non-negated form. On the other hand, the stative form simply refers to negative static situation. For example, la: ma wa: (Water. ABS NEG-come.St) simply states no water came out when the tap was turned on, while la: ma wala water.ABS NEG.F. come-PD means "Water did not come any more" which suggests the establishment of the opposite state. As for negation, some typological consideration is given, including Japanese, Mandarin Chinese and Thai.

The Causative Motion Verbs and their Extended Uses in Newar

Ikuko Matsuse

Keio University, Japan.

Like other SOV languages in Asia, Newar employs several predicates which function both

as independent and auxillary verbs (“ versatile Verbs” Matisoff 1973). Recent studies share the notion that aspectual function and speaker’s attitudinal function play important roles for deeper understanding of the extended meanings (Genetti 1986, Hargreaves 1986, Kiryu 1999). in this study, I focus on causative motion verbs such as chwaye(to send)’, haye (to bring)’, yanke (to carry),’ and biuye (to give)’ and examine their extended uses and interrelations as auxillary verbs. These meanings are closely related. For example, the verb, chwaye(to send)’, has the following interpretations related to others as in (1).

- 1) a. jī hisāb yānā chwoyā
 1 sg.-ERG calculation do PC -send. PC
 “ I finished calculating “
- b. Rāmā tajyāgu ghari bānlāka daekā chwola
 Ram-ERG break.ST-NL clock well fix.PC send.
 PD
 “Ram fixed the broken clock (and the customer went back receiving it)”
- c. Rāmā tajyāgu ghari bānlāka dayekā bila
 Ram-ERG break.ST-NL clock well
 fix.PCgive.PD
 “Ram fixed the broken clock for the customer.”
- d. Rāmā gha(De ta:gu la: dakwo he twonā chwola
 Ram-ERGpot-LOC put..ST.NL water all EMPH
 drinkPC send.PD
 “To my surprise, Ram has drunk all the water in the pot.”
- e. Rāmā hisāb yānā hala.
 Ram.-ERG calculation do PC bring. PD

(1a) has the perfective meaning. In addition to being perfective, (1b) means that Ram handed the clock to the customer after fixing it. Both (1b) and (1c) imply that the customer is satisfied with the repair. The evidential reading is available in (1d). Further more as opposed to

(1a), (1e) has an inchoative reading. Therefore, it is necessary to analyze the interrelations of these verbs in a unified fashion.

In this study I propose a lexicalization system of the motion events to account for these various interpretations, based on the motion-schema and the mapping mechanism. I will elaborate the semantic element path, employed in Talmy 1985, and combine the view point perspectives with Path in transitivity. I also exploit the framework of construction developed in Goldberg 1995, based on the assumption that auxiliary verbs inherit the semantic properties as main verbs and function as a framework for metaphorical extensions.

Is Nepal Bhāshā a Tibeto-Burman Language ?

Daya R. Shakya
 Center For Nepalese Language and Culture
 Portland, USA

Of course it is a Tibeto-Burman language! However, in view of influence from non-Tibeto-Burman languages, it seems that Nepal Bhāshā has lost many of its features due to heavy lexical borrowing from other languages in colloquial and written forms. Hence, raising a question on its relationship to parent languages creates a controversy until thorough discussion has taken place, enough data from the contact languages have been analyzed, and a conclusion has been drawn by the experts.

Upon examination of the features of the different stages of development, Nepal Bhāshā appears to be heavily influenced by the following non-Tibeto-Burman languages, chiefly Sanskrit, Hindi, Maithli, Parsi and Nepāli. The review of the several words in Nepal Bhāshā and English Amatya (2000) has raised the

question as to whether it has also been influenced by the English language above and beyond the obvious heavy borrowing of modern technological vocabulary. This paper analyzes the classical Nepal Bhāshā text and identifies the core lexical items, including morphophonemic and syntactic features that show its relationship with other non-Tibeto-Burman languages and contains comparisons of the classical text to the modern forms of Nepal Bhāshā.

In addition, this paper also discusses the degree of borrowing of vocabulary from the non Tibeto-Burman languages and illustrates the deviating feature of Nepal Bhāshā towards Indo-Aryan languages in the classical and modern written texts. The data for this study has been drawn from the recently published Dictionary of Classical Newāri (2000), which includes the various classical texts taken from hand written manuscripts, colophons, palm leaves, and inscriptions ranging from the 11th to the 18th centuries. Data for the modern texts have been collected from printed books, newspapers, bulletins, circulations, and announcements issued by various social agencies.

Panel Discussion: Buddhism and Identity in the Himalayas

Newar Buddhists in the Vortex of Countervailing Cultural Forces

Todd Lewis

Holy Cross College

E-Mail: tlewis@holycross.edu

Newāh Vijñāna -4

Contemporary Newar Buddhists have experienced a growing multiplicity of choices in the Buddhist traditions represented in the Kathmandu Valley. While their long established Vajrāchārya saṅgha continues to perform rituals for the majority of households, Theravadian institutions draw growing number of merit-making rituals and vipassana meditation programs. Japanese sects have also gained a following. Various Tibetan Lamas, whose institutions have mushroomed in the Valley since 1990, still attract Newar disciples, usually for healing rituals. Most recently added to this pluralistic urban scene are two reformist/modernization initiatives that have arisen from within the high Buddhist organizations. After surveying this religious field, the paper will examine how these latter two groups reflect the democratic political environment of contemporary Nepal; it will also explore how they must balance their initiatives amidst the forces of "Newar nationalism" on the one hand, and a rising awareness of Buddhist universalism, on the other.

Iconology of Vasundhara in Nepal: Deciphering Categories of Tantric Buddhist Methodology

Dina Bangdel

Western Michigan University

E-Mail: dina.bangdel@wmich.edu

Tantric methodology often categorizes deities, ritual, and meditation as 'bāhya' "outer", 'guhya' "secret" and abhayantra "inner." These generally reflect the movement from exoteric, openly accessible tantric practices to secret, more esoteric spheres that are restricted to the initiated. Iconology and symbolism of Buddhist images may also be interpreted to signify such

Dissertation, Theses and Research Abstracts 51

core categories of tantric practice. The paper will discuss the iconology of Vasundhara in this context and place it within the larger cult of Tantric goddess (yoginis) of the Newar Buddhist community in Nepal. As the patron deity of Buddhist women and as the goddess of wealth, Vasundhara is central to the lay practices. Yet, her iconology also hints at practices that are confirmed to the highly esoteric methodology of the highest Yoga Tantras, Using the ritual practice and material evidence, the paper aims to decipher Vasundhara's multivalent symbolism within the categories of tantric practices; further, Vasundhara's role among the Tantric Buddhist yoginis will also be considered.

Jalashayana Vishnu Imagery in Nepal: The Newar Tradition and Valley History

Natalie R. Marsh
Ohio State University
E-Mail: marsh.69@osu.edu

The image of Vishnu Anantasayana (Vishnu-reclining-on-the-serpent-Shesha") is widely known throughout India. Jalashayana, sometimes also called Sheshasayi Narayana and Ananta Narayana, is found in a unique setting and context in the Kathmandu Valley. Out of four large reclining Jalashayana images known from Nepal, two are currently situated within large water tanks at sites that are actively visited and widely venerated- Bālanilakantha and Buḍhānilakantha. Mary Slusser and Gautama Vajracharya have worked extensively on the dating, commissioning, iconographic, and political implications of these works. In concert with these significant contribution, I propose that an ethno-religious and culturally specific explanation for the commission of these unique

and rare forms rests in the creation myth of the valley, which was once a lake.

Local-Global Articulations: Neoliberalism and Newar Economics of Practice.

Katherine N. Rankin
University of Toronto
E-Mail: rankin@geog.utoronto.ca

This paper considers the articulation of global political-economic processes with local contexts of power through a study of the "economics of practice" (à la Pierre Bourdieu) in the merchant community of Sankhu in the Kathmandu Valley. It first illustrates the dialectical relationships among gender and caste ideologies prestige systems, and patterns of social inequality. At the scale of individual consciousness, following the work of Steven Parish, the paper then explores the ways in which such ideological constructions occupy the minds and lives of women and low castes as common sense as well as the extent to which women and low caste recognize the established order as an arbitrary human construction. This discussion highlights the critical resources available within culture should planners learn how to recognize them. Finally, the paper considers how neoliberalism and the associated "open market" policies articulate with the Newar economics of practice. In particular it evaluates the progressive and regressive tendencies generated for women and low castes in the articulation of local cultural economies with emerging service-sector labor markets in Kathmandu and patterns of commodification.

Cashing in on Culture: Or From Dharma To Capital In Three Easy Steps Emerging Cultures of Economy in the Kathmandu Valley

Gregory Grieves
University of Chicago

This paper is an initial exploration into the economics of cultural tourism in the Nepalese City Bhaktapur. It concentrates on the Bhaktapur Festival 1997, which was held on October 22-26, 1997. This cultural gala attracted 400,000 Nepalis and 20,000 Western tourists, and hinged on Bhaktapur's role as Nepal's "Cultural Capital". Since the reconstruction of the over 189 of Bhaktapur's temples by the German-funded Bhaktapur Development Project, and the appropriation of heritage conservation by the local municipality, tourism plays an ever-increasing role in Bhaktapur's economy. From Bhaktapur's five dollars admission fee to the small boys who hawk their services as guides, as one American expatriate living in Kathmandu said to me, "in Bhaktapur, when I hear the word 'culture' I reach for my wallet." Yet, the economy of tourism is more complicated than the strip mining of the city's heritage. And while some residents worry about "cultural pollution," most people in Bhaktapur are proud of their city's new-found fame as a UNESCO World Heritage City. Moreover, they appreciate how tourist funds have been used for the city's upkeep and the renovation of temples. In the paper I will outline the strategies for turning dharma into culture, and culture into capital, and show some of the ways that Bhaktapurians have put their "culture" to work.

The Karmāchāryas:

Religious/Secular Role in Bhaktapur City

Swami Chetanānanda, Nityānanda Institute in Portland, Oregon

Tirtha Prasād Mishra, Center for Nepal and Asian Studies TU, Kathmandu, Nepal.

Bhaktapur, located eight miles east of Kathmandu, is a well preserved ancient city with a unique history and an important cultural and religious tradition. For centuries, Bhaktapur was the Nepalese capital, as well as the seat of the royal palace. Under the rule of the Malla kings from the 12th to the 16th century, Bhaktapur became the leading political and cultural city in the region.

The Newars, or indigenous people of Nepal, created a royal city based on the model of a tantric mandala. The ruling kings in Bhaktapur employed priests called Karmāchāryas to perform elaborate rituals to ensure the protection and prosperity of the kingdom. For centuries, the Karmāchāryas were the primary practitioners of esoteric goddess-based rituals and practices relating to *karmakānda*, or death ceremonies. Legends and chronicles recount the spiritual power of the Karmāchāryas and their important role as priests to the royal court.

Little research has been done on the history of the Karmāchāryas and the influence of their practices. As a result, a study is underway to attempt to shed light on this important and rare tradition. Heading the research committee for this project is Swami Chetanānanda, Director of Socio-religious Traditions of Nepal and the Nityānanda Institute in Portland, Oregon and Professor Tirtha Prasād Mishra, Executive Director for the Center for Nepal and Asian Studies (CNAS). Both chairmen will work with a team of specialists and researchers on a seventeen month investigation on the history and culture of the Karmāchāryas. The study will focus on the origin and development of the Karmāchāryas within the context of Śaivism and Śaktism. The goal of the project is to develop a deeper understanding of Newar culture by examining the karmacharyas and their practices in order to better understand the rich and sophisticated ancient culture of

Kathmandu Valley.

'Sugata Saurabha'

(The Life and Teachings of the Buddha)

by

Chittadhar 'Hridaya'

(1906-1982)

Since the late 1960's, literature students in America have been introduced to a more culturally-diverse body of poetry, fiction and creative nonfiction than ever before. Particularly popular are the works of contemporary fiction writers with Asian backgrounds--for example, Indian-American novelists Chitra Divakaruni and Bharati Mukherjee. For American college teachers, steeped in the more traditional British and American canons, this new interest in Asian literature has presented both an opportunity and a challenge. Without a background in Asian cultures themselves, they may hesitate to go into the same kind of depth they would if they were teaching a novel by, say, Ernest Hemingway or Toni Morrison.

The problem is compounded with older works. While a British poem like Alexander Pope's 18th-century *Essay on Man*, for example, is already difficult for modern students, at least many of them are familiar with the Judeo-Christian context in which it was written; they can "understand" this long and complicated work because they know the philosophical, historical and theological background from which it sprang. For American teachers to do justice to an Asian

poem of the same era, however, requires that they know quite a bit more about both Hinduism and Buddhism than they usually do. For this reason and others, the recent translation of Chittadhar 'Hridaya's' *Sugata Saurabha: the Life and Teachings of the Buddha*, is a welcome addition to the English-language body of litera-

ture. Not only does it present the significant historical events in the life of the "Shakya Prince," as 'Hridaya' often refers to him, but it also lays out some of the key points in the Buddha's Doctrine of the Middle Path. In addition, the descriptions of setting, dress, customs and rituals are extremely helpful for the literature teacher without much background in Asian history. And finally, *Sugata*

Saurabha represents an interesting contribution to the study of comparative literature.

Despite the fact that Buddhism has become increasingly popular in America since the 1960's, most English-language books on the subject are "Westernized" in the sense that they focus on the practice itself, or on the philosophy behind the practice, rather than on the Buddha as he appeared to his own culture. Though his life story is a familiar one, most Americans have heard only a truncated version. Hridaya's

epic helps give the Buddha a human face; his stepmother, Queen Gautami, becomes a quiet heroine when she accepts the motherless Prince Siddhartha as her own, and his father, the powerful King Shuddhodana, grieves as any father would grieve when his promising son renounces his princely legacy. A young cousin, Nanda Kumar, is drawn into the Buddhist Brotherhood against the will of his beloved wife, Sundari, and suffers mightily throughout his first months as a monk. And Siddhartha's own wife, Gopa, has an agonizing time of it reconciling herself to the loss of her husband. The great historical epics of Europe--for example, Homer's *Iliad*--have lived on through the centuries because they are populated with genuinely human characters like these.

Yet *Sugata Saurabha*, though set 2,500 years ago, was actually written in contemporary times. Its author, well-known Newar writer was imprisoned in 1941 in the Central Jail of Kathmandu for alleged conspiracy to topple the Rana government. He wrote the epic during the six years he spent in shackles and chains, and after his release led the movement to regenerate the Newar language and literature. His own essays, short stories and plays eventually earned him the title of *Kavī Keśari* (Lion

Among Poets), an honor bestowed on him by King Mahendra. The epic itself was translated into English by Mr. Tirtha Raj Tuladhar in 1996, and for the most part, works well for native English speakers, though more thorough explanatory notes would have been of great help. Someday the Nepal Bhasha Academy may also wish to consider a reprint that eliminates the frequent typographical errors, which slow down the reading. There are also puzzling moments when pronoun antecedents are missing. And an additional look might be taken at apparent anachronisms--terms such as "Dad" and "Mom" that are quite modern and casual to American ears and don't seem to adequately capture the relationship between a prince and his royal parents. For a non-Newar speaker, of course, it is difficult to determine whether these are part of the original document or come from the translation.

All in all, however, *Sugata Saurabha*, becomes a fascinating read for Americans interested in the life of the Buddha and in Newar history and arts. One would hope that the availability of this work in English will lead to a new interest in Newar and Nepalese literature in America.

*Paula Huston
California, USA

* Paula Huston teaches writings and literature at Cal Poly Luis Obispo, California, and is on the permanent faculty of the California State University Consortium of Fine Arts in Creative Writing program. A novelist, short story writer and essayist, she is the author of *Daughter of Songs* (random House, 1995), and co-editor and essayist for *Signatures of Grace: Catholic Writers on the Sacraments* (Dutton, 2000). In 1994 she was awarded a National Endowment of the Arts Fellowship in Creative Writing.

Sacred Buddhist Dancer Prajwal Ratna Vajrāchārya

Tantric Buddhist Dances of Nepal documents the mythological origins of the Kathmandu Valley. According to the Swayambhu Purana text, Vipaswi Buddha discovered a divine light rising out of an ancient lake at the location of this valley. Bodhisattwa Manjushri, went to the lake and had a compassionate vision to make the area inhabitable by people. He cut a gorge to drain the lake, and sacred valley was formed. At the location of divine light, a Buddhist monument, or stupa, was consecrated as Swayambhu Māhāchaitya, by a famous Tantric practitioner, Shāntikārāchārya, who also is regarded as the composer of one of the oldest and best known charyā songs.

Charyā Nritya, a Sanskrit term meaning “dance as a spiritual discipline.” is an ancient Vajrayāna Buddhist dance tradition that until recently was unknown outside the circles of initiates who perform it. This sacred dance form is one of the religious arts of the Tantric Buddhist priests of the Kathmandu Valley, who performs it as part of their esoteric meditation and rituals. Each dance, through bodily gesture and energy directed movement, invokes a different deity, such as Manjushri, Avalokitesvara, Vajrayogini, or vajrapāni. The Tantric practitioner dances in a state of deep meditative awareness in order to embody the living presence of the compassionate, peaceful, and fierce divinities, who are described in the esoteric Sanskrit *charyā-giti* songs, sung as an accompaniment to the dance. Generating the mandalas of the body, voice, and mind to realize

oneness with the deity is the practitioner’s goal. *Charyā-giti* are sung individually or by a group, with variety of *rāgas* (melodies) and *tālas* (meters); and accompanied by small cymbals known as *tāḥ* and sometimes by a two headed drum, ‘*damaru*’. The songs begin with a flowing *rāga*, followed by a more material section, including description and praise of the deity, usually consisting of changing verses and a fixed, repeating refrain. Some times a *dhārani* praise invocation is inserted near the beginning.

The director of the Dance Mandala institute in Kathmandu, Nepal Prajwal Ratna Vajrāchārya, son of famous Buddhist scholar Ratna Kāji Vajrāchārya arranged with his family to a tape in order to provide access to the traditions of Vajrāchārya Buddhist lineage which until recently have been kept secret for reasons of persecution and the power they bestow on audiences. Spiritual understanding and initiation is still required of those who undertake this discipline in order to ensure right conduct and right motivation.

Following the historical introduction at the beginning of the videotape, a selection of charyā Nritya are performed by students of the Dance Mandala Institute, and Prajwal Ratna Vajrāchārya, in traditional courtyards of the famous Buddhist monasteries of Kathmandu Valley. To facilitate understanding the dance movements and the charyā-giti song text, the iconography of each deity is explained and augmented with images, paintings, and bronze sculptures. The dances performed by Dance Mandala artists include enhanced costuming to

assist contemporary viewers with the intended visualization of deities. Further descriptions of the deities and Dance Mandal are available at the Dance Mandala Web site: <http://www/liberty.net.org/meditate.dance.html>.

Prajwal Ratna Vajrācārya belongs to one of the Tantric lineages of Nepal and has been trained in this dance from since the age of eight at thirty two years of age, he is now the premier performer and proponent of the tradition. As a solo performer he is recently won first prize and medal from his majesty the king of Nepal in an all Nepal dance competition held in the honor of the late king Birendra's 25th anniversary of

coronation. No small feat in a country rich with dance tradition ! Mr.Vajrācārya is a veteran of several successful world tours and has danced solo for profoundly moving. Witnessing this rare dance form is an exciting spiritual event and a learning opportunity for persons interested in dance, drama Buddhism, or Asian culture. Please turn page 75 for an extensive interview with him on the *charyā nritya* tradition in Nepal and his experience in this field. Currently, he is performing at various institutions in Oregon. If you need to reach him for a show or dance lesson in your area please contact us.

Graduates with Nepal Bhasha Major 2001

In a reconition ceremony organized in Kathmandu on August 22, 2001 the following students were awarded with certificates and cash prizes on successful completion of School Leaving Certificate (SLC) with Nepal Bhasha as the major subject in their high school studies in the year 2001. We congratulate them for showing love to Nepal Bhasha and success in the examination.

Digitalization of the Ashā Archives Kathmandu, Nepal

Introduction:

The Asha Archives is a public library of Nepalese Manuscripts, named after the late Mr. Asha Man Singh Kansakar, father of the late Mr. Prem Bahadur Kansakar (1917-1991). Mr. Kansakar was a prominent activist, social worker, educationist and Newar writer who had founded several social, cultural literary and educational institutions. The nucleus of this collection was donated by Prem Bdr. Kansakar to Cwasa Pasa, a premier literary association of Newar writers on August 16, 1985. The Archives was inaugurated by Prof. Yujiro Hayashi, the executive director of the Toyota Foundation, Japan on December 7, 1987. It was made accessible for the public since that day. The Toyota Foundation had made a grant to purchase, innovate and furnish the house where it is now located. The Foundation had also supported the documentation of manuscripts and the initial operation of the Archives with a fund deposited as seed money and endowment. In collaboration with the Buddhist Library of Japan, Nagoya, the Asha Archives has recently completed the digitalization of its entire collection of manuscripts. Since the project is complete this year all the manuscripts including their paintings and illuminations are available on CD-ROM (125 cd's)

The Collections

In this archives there are several valuable collections of palmleaf, loose leaf pothi and folded manuscripts (thyāsaphu). There are more than 6700 manuscripts and about 1100 palmleaf landgrants documents. These manuscripts belong to various sects and genres written in different languages and scripts. Largest among these are the ritual texts, medical texts, manuals of magic and necromancy, astrology, astronomy, Vedic, Puranic, and Tantric texts of Shaiva, Buddhist and shakta sects. A large number also come from the Mahayana and Vajrayana sects. There are technical and symbolical drawings and architectural designs of religious and secular structures, painted covers, and book illustrations of great beauty and delicacy.

Perhaps the most important component of the archives are the literary texts, hymns, songs plays, popular narratives, didactive tales and Buddhist avadanas in the Newar language. Written in Sanskrit, Nepal Bhasa, Maithili, and Nepali languages one can find specimens of beautiful calligraphy in the collection written in plain black ink, silver and golden letters. 4. A short title catalog of 5382- cataloged manuscripts in the collection *Ashā Saphuku thiyā dhalah*: 'A Short Catalogue of Asha Archives' (Continued on page 56)

An announcement
Newāḥ Organization of America (NOA)

Jojalapā and Nhugu Dā-yā Bhintunā .

We the members of the adhoc committee of the 'Newāḥ Organization of America' wish you a happy, prosperous and healthy Nepal Sambat New year 1122. To mark the dawn of new decade we are sending out this important message to all Newāḥ friends and families, to let you know about an emerging organization in our community. We would appreciate if you could take a moment and read the content of this message.

The aspects of our community have been changing rapidly. Some are in our favor and some are not in favor. Vital elements of our community need urgent attention, restoration and revitalization. Many has been lost and forgotten because we do not know that they exist, others have been abandoned due to lack of resources and still many valuable assets of our human resources has been left untapped. We think that the time has come for us to put together our ideas, energy and resources, and resolve and complete the beautiful picture of the Newāḥ community.

We have envisioned this emerging Organization to grow into a broad based, vibrant and result oriented ideas and opportunities for innovation and creativity along with sense of history and culture as the driving force. The organization shall be the home for varied ideas and thinking across the spectrum, and working together in a democratic way to fulfill the dream of Newāḥ people.

We believe and cherish the democratic process with complete transparency in the work ethics and election process. This organization will make special effort to reach out to members

from all over the United States and utilize the new technology to communicate and network among the members. Different regions of the country shall setup a self-functioning area chapters to listen to the aspiration of the regional members. This will help us to utilize and pool together valuable resources of the community and tap into them where they are and not wait until the resources come to you.

Having said all this, we would like you to know in brief how the organization has reached this present stage. After much thinking and serious deliberation from concerned members of the community an adhoc committee was formed last March to put together an organization relevant, meaningful and democratic in its character. In subsequent meetings the adhoc committee coined the name of the organization through a series of votes, and the "*Newāḥ Organization of America*"(NOA) was born. Work began to give the organization a framework, and a foundation to build upon. A Constitution Drafting committee was constituted and after some months of energetic discussion , on the 4th of Nov. 2001 the final draft of the Constitution was adopted by the adhoc. Based on this framework, activities are now being carried on to implement the formation of the organization's main body, the members, conduct an election and form the first Executive body of the Organization.

All Newāḥ people are considered members of the organization- that's how the constitution is written, Therefore, NOA calls upon all Newāḥ people to send in their names and addresses to be registered as voting member of the Organization. The membership is free as

indicated in the Constitution. We also ask you to send in your ideas and thoughts on how to make our community active and productive. Your proposals will be seriously studied and shall be adopted as ideas leading the ways. A fund/account has also been created, and from time to time donation in kind and money will be solicited to carry on important works, projects, seminars, conferences and other activities as the time goes by.

A copy of the New Constitution of NOA (a word document) has been included for your information. Please spend some time reading through it and feel free to write us back. It is important for us to hear from you. Your participation is important to us. We will appreciate your feedback, comments and suggestions.

To give you an idea on what we are working on, in other words, the Plan of action for the nearest future is as follows:

- 1."Get-to-gether" evening with topical presentation, membership drive and nomination of Election commission in February 2002
- 2.First general meeting of NOA members, Election of the First Executive Body and Topical presentation on 25th May, Memorial day weekend 2002

More detailed information and schedule of the day will be sent to you shortly as we finalize the program. More information will be disseminated in our forthcoming quarterly Newsletter "LASKUS" ' Welcome' soon and in our

website www.Newāh.org

Finally, but not the least, we would like to urge each member to be vigilant and alert about the state of our community, history, culture, language and techno-scientific development and all-round development of the Newāh Persona as such. We cannot afford to be disconcerted, indifferent, lagging and left behind as the world moves aggressively into the 21st century. Each Newāh person is a mind full of latent talent and we can do better by exposing the full potency of this invaluable human resource.

Come, let's join together in this wonderful experience as this organization develops and expands. It is large enough for all of us to work together and serve our community. This organization is committed to be open, transparent, and strictly abide by the democratic values and practices which you can well see as indicated in the Constitution Our website www.Newāh.org is a testimony to this. Spend some time browsing our website and read our meeting minutes and other information that we have put up. Send us your ideas as we can use all the help we can get.

Write to any member of the adhoc Committee with your questions and comments and we shall be glad to reply. Thank you for your time and wish you all the best of the season and Happy New Year. Subhae !!!!!

Nepal Era (Sambat) Awaits Government Recognition

Razen Manandhar

Reprinted from

'Kathmandu Post' 11/15/01

He was only a layman but he not only liberated all of his fellow citizens from all their debts but launched a new era by the name of his country, after taking permission from the monarch. That was exactly 1,122 years ago.

The New Year is celebrated with extra vaganza in cultural milieu, rock-n-roll concerts and boisterous motorcycle rally at least in the Kathmandu Valley and some other cities where the Newars predominantly reside.

"There was a merchant called Shankhadhar Sakhwa in ancient Kathmandu who possessed piles of sand that turned into gold. Rather than using it for his personal purposes, he paid off all the people's debt and launched a new era," says historian Bhuwan Lal Pradhan, quoting ancient history books.

The kings of all the dynasties marked this Era in their historical inscriptions for over a millennium until the year 1911 when Rana Prime Minister Chandra Shumsher replaced it by a solar calendar Bikram Era, on the pretext that the government had to pay salary of 13 months in every three years when lunar calendar was used.

Pradhan adds that Nepal Era plays a pivotal role in the cultural life of Nepalis as most of the festivals are celebrated according to the lunar calendar upon which Nepal Era is based.

Though the whole cultural life of Nepali people is guided by the Nepal Era, it is never used directly in administration these days.

Secretary of Nepalbhasa Academy Indra Mali said that the Nepal Era deserves government recognition as it is established by a

citizen and carries the country's name. This must be only one Era of its kind in the world as most of the eras are either based on religions or established by monarchs.

The Newars, the indigenous people of the Kathmandu Valley took initiative to revive the glory of Nepal Era after the democracy of 1950. The Nepalbhasa Mankā Khalah (NMK), a community organisation gave it a formal touch after the NMK started carrying out cultural rally on the first day around the core city in 1988 and a glamour events like motorcycle rally also became the part of the festival-cum- movement.

However, as community leaders admit, this support of the Newars to Nepal Era unknowingly gave an impression among the people that the Era belongs only to the Newars.

Padma Ratna Tuladhar, the chairman of NMK says that as the Newars show active participation in celebrating this national event, people from other communities as well as political parties have a misconception that Nepal Era is a Newari one with significance only to the Newar community.

"This is the reason why after promising speeches on its value and importance of its recognition by the government from political parties, several prime ministers and other prominent political figures, the implementation is showing lukewarm response," he says.

Tuladhar says if Nepal Era belongs to the Newars only, this must also be the case with the art and architecture of the ancient Kathmandu Valley that was created by none other than the Newars.

"The state should recognise Nepal Era as the national heritage and emblem of unity, coming out of boundaries of who created this Era in the name of the country," Tuladhar adds.

He says since the present official calendar Bikram Era is Indian by origin, the state should replace it with Nepal Era, which has a rich history and is attached to the cultural life of the whole country.

Tuladhar suggests that the state could use internationally recognised Western calendar for

daily use after accepting Nepal Era as our national calendar.

He further clarifies that the movement of Newars for indigenous people's right or development of their mother tongue is quite different from the annual function that takes place on the fourth day of Tihar.

"The movement of Nepal Era may end after the government recognises it. But the movement for the development of local language and culture will not," he says.

Official recognition of Nepal Era demanded

Nov. 15th 2001

From Kathmandu Post

A 15-member joint delegation of the Valley Co-ordination Committee of the main opposition party CPN-UML and New Year 1122 Celebration Committee met with Prime Minister Sher Bahadur Deuba this morning and handed over a seven-point demand regarding official recognition of Nepal Sambat.

According to Krishna Gopal Shrestha, the coordinator of the celebration committee, among the demands were the declaration of Shankhadhar Sakhwa, a national hero and release of postal stamp in his honour.

The Nepal Sambat was started after Sakhwa freed all the people of the country by paying all their debts 1122 years ago. According to committee members, they were insisting the government to recognise this era officially since

it was the date which started genuinely from Nepal.

"Till now many people think that Nepal Sambat is just followed by the people of the Newar community but before the time of Chandra Shumsher this was regarded as the official date," said Laxmi Das Manandhar, Chairman of the Nepalbhasa Manka Khala.

Even historic treaties between Nepal and Tibet has mentioned this date. This is why we are asking the govt to revive this era, Manandhar added.

"Although the Prime Minister has assured that he is willing to look into the matter, only one of our demands that of releasing a postal stamp in Sakhwa's name is likely to be fulfilled soon," Shrestha further said.

Svayambhu Purāṇa

(A discourse on the origin of Svayambhu Stupa in Kathmandu Valley)

Translated by
Shantaharsha Vajracharya & Min Bahadur Shakya
ISBN:99933-344-0-5

Nagarjuna Institute organized a Book release ceremony at the premise of Hiranyavarna Mahavihara, Patan on Aug.24 2001. Ven. Choekyi Nyima Rinpoche was the honorable chief guest of the occasion.

This noble discourse "Svayambhu Purāṇa", one of the most important book on Nepalese Buddhism, was sponsored by Mr. Gyan Jyoti Kansakar to shower the blessings of triple gems on their late parents Mr. and Mrs. Bhaju Ratna Kansakar.

This present text is the only complete translation of the Svayambhu Purāṇa texts found in numerous recensions (at least four). The translation is based on the earliest dated manuscript 1558 AD. /678 NS. The text has ten chapters (1750 verses) and it contains a summary of all ten chapters in English with historical introduction. His Holiness Dalai Lama and Ven. Thrangu Rinpoche have given words of blessings as foreword to this volume.

सम्पादकीय

नेपा...ल सम्बत ! राष्ट्रिय सम्बत ! ! न्हुगु दँया भिन्तुना ! ! !

यी नाराहरुले तीव्रताकासाथ काठमाडौंको गल्ली गल्लीमा गुञ्जायमान भएको आज २१ वर्ष बित्यो । यस नाराले अब वयशकको रूप धारण गरिसकेको छ । अब यसलाई कुनै शक्तीले पनि संकुचित पार्न सक्तैन भन्ने आशाको ज्योति फैलिएको आभास हुन्छ । यसलाई अझ तीव्रता दिनु सिवाय सिधिल कहिलै हुन सक्तैन । त्यसैले यसले संसार ओगट्न थाले स्वरूप अमेरिकी महादेशमा पनि यो स्वर गुञ्जन थालेको छ ।

एकातर्फ यस संबतलाई राष्ट्र संबतको रूपमा कायम होस भनी मांग गरिएको पाइन्छ भने अर्को तर्फ यसलाई ' नेवारी संबतको नाउंले सीमितता दिन खोजेको पनि देखिन्छ । नेपालको इतिहासमा काठमाडौं उपत्यकालाई मात्र नेपाल भनीने गरेको कुरा कपोल कल्पित होईन । त्यस्तै त्यहांका वासिन्दाहरु नेपालको मौलिक जाती हुन भन्ने कुरा पनि सांचामा ढालिएको सत्य होईन । तर त्यस आदिवासिहरुको मौलिक संस्कृतिलाई नेपालको राष्ट्र संस्कृति भन्न हिचकिच्याउने एक ज्वलन्त उदाहरणले हामी सामु अभिशापको रूप लिएको छ । नेपाल संबत पनि यहि अभिशाप को भुमरीमा मुछिएको छ । त्यसैले यस संबतबारे गलत धारणाहरु प्रचारमा आएका छन् । यसका प्रवक्ता शंखधरलाई राष्ट्रिय बिभूति घोषित गरे पनि ' नेपाल संबत' लाई राष्ट्र संबत भन्ने जमको उठाईएको छैन ।

हिमालयको काखमा अवस्थित सानो देशलाई नेपालै कायम गरे पनि त्यही देशमा उत्पति भएको संबतलाई नेवारहरुको संबत भन्ने अप्रिय भावना व्यापक गराएर संकुचित पार्न खोजेको देखिन्छ । जब शंखधरले देशका जनतालाई ऋणबाट मुक्त गराए त्यसबेला छानी छानी नेवारहरुलाई मात्र मुक्त गराएको होईन सम्पूर्ण जनतालाई नै मुक्त गराएर नेपाल संबतको स्थापना गरी शान्तिको सन्देश फैलाएको आज ११२२ वर्ष पुगिसकेको छ । यहि शुभ मुहुतको संझना गर्दै नेपाल संबत नव वर्ष ११२२को शुभउपलक्षमा समस्त मानवजातीको कल्याणको निम्ती मंगलमय हार्दिक शुभकामना व्यक्त गर्दछौं ।

भक्तपुरको थंथु दरवार

लीलाभक्त मुनकर्मि

भक्तपुर

In this article, the author Lila Bhakata Munakarmi has described the location of Malla period Thathu Royal Palace in Bhaktapur that was destroyed by the earthquake of 1933.

मल्लकालको शुरुवातपछि र यसको अन्त्य सम्ममा भक्तपुरमा राजदरवारका महलहरू धेरै निर्माण गरिए । ती राजदरवारहरूमध्ये थंथु दरवार पनि एक चर्चित मानिन्छ । यो दरवार जयजीतामित्र मल्लले भव्य रूपमा निर्माण गराएका थिए तर यस दरवारको चार किल्ला, उचाई आकार बारे बिस्तृत जानकारी भने पाउन सकिएको छैन । यस अध्ययन को सिलसिलामा श्री तलेजु भवानीको उत्तर-पूर्व कुनामा गहिरी धारा समेत निर्माण गरिएकोबारे एउटा शिलापत्र प्राप्त भएको छ । त्यसको नेपाली रूपान्तर निम्न प्रकारको छ ।

"श्री श्री सुमती जयजितामित्र मल्लदेव प्रभु ठाकुरले आफ्ना श्री श्री ईष्ट देवतालाई खुशी पर्ने इच्छाले भागीराम प्रधान मन्त्री भएको बेलामा यो थंथु राजदरवार बनाउनु भयो । अब यस थंथु दरवारलाई कसैले बिगार्नु हुँदैन । चोकहरू भित्र बाहिरका भागहरू, बगैचा, कौसी, धारा समेत राजदरवारमा अघिदेखि चलि आएको नियम बमोजिम नै गर्नुपर्छ । राजदरवारको विषय नियम उलंघन गर्न पाईँदैन । श्री श्री टीकाधारी (गद्दीनसिल) राजाले जिर्णोद्धार गर्नु पर्छ । श्री श्री जयजीतामित्रदेव, श्री श्री जय उग्र मल्ल देव, श्री श्री जय भूपतिन्द्र मल्ल देव ने. सं. ७९८, शक सम्बत १६००, कलि गत सम्बत ४७७९ वि. सम्बत १७३५ आषाढ शुक्ल दशमी स्वाती नक्षत्र सिध्दी योग, तैतिल कर्ण, बुध्द वार मिथुन राशीमा चन्द्रमा बसेको दिन थंथु दरवार बनाइयो ।"

यस अभिलेखमा जितामित्र मल्लले ने.सं. ७९८मा बगैचा कौसी, धारा समेतको थंथु नाम गरेको दरवार बनाएको उल्लेख

गरिएको छ । अभिलेखमा दरवार भित्रनै धारा बनाएको कुरा उल्लेख गरिएको छ । श्री तलेजु मन्दिरको उत्तर पूर्व कोणमा दरवार बनाएको ठहर अनुसार हाल नगर पालिका कार्यालय बसेको स्थानको धारा नै थंथु दरवारको ईलाका हुनु पर्छ भन्ने कुरा निश्चित हुन्छ । यहि स्थानमा राणा शासन कालका वडा हाकिमहरू बस्ने गर्दथे । पछि यो दरवारलाई विदेशीहरूको कलानिर्माण कार्यको नक्कलमा दरवार निर्माण गरिनाले थंथु दरवारको नामै लोप हुन गयो र वडा हाकिम घर नाम रहन गयो । पछि बडाहाकिम परिवारलाई सुबिधा होस् भनी यो दरवारका कोठाहरू परिवर्तन गरी बिग्रेको स्थानमा जिर्णोद्धार गरिएको थियो । दरवारका झ्यालहरू पनि विदेशी ढाँचा अनुकरण गरी आधुनिक झ्यालहरू जडान गरेका थिए । बि.सं.१९९० सालको महा भूकम्पमा यो दरवारको केही भाग नष्ट भएकोले झिँगटीका छाना, टुंडाल र तोरणहरू हटाई जस्ताको छाना हालेर जिर्णोद्धार गरिएको थियो । यस जिर्णोद्धारबाट मल्लकालीन कलाको सौन्दर्य लोप हुन गयो ।

उक्त दरवारभित्र स्थापित सुनको हिति मंग(मकर)लाई सुनको पातामा र धारा माथिको देवदेवताहरूको आसनमा आभिलेखहरूमा राजा जयजिता मल्लले निर्माण गरिएका चोकहरूको नाम पनि उल्लेख गरिएको पाईँन्छ । यी अभिलेखहरूमा उल्लेख गरिएका चोकका नामहरू यस प्रकार छन्- इति पुर पुर दव, इति चुक, तुथि, तुथ, चुक, लक्ष्मी विलाश चुक, दुमाजु चुक, किसिगर तोगण, तुथी आदि ने.सं. ८०८ वेशाख शुदी तृतीया । यी चोकहरू अद्यावधि छन् । तर यहाँका अधिकांश देवदेवीका मूर्तीहरू भने चोरेर लगिसकेका छन् ।

हामी कसरी नेवारै भई रहने ?

डा. तुल्सी महर्जन

न्यू जर्सी

In this article, the writer Dr. Tulsi Maharjan has expressed his opinion on how to maintain the unique feature of Newar cultural heritage and preserve it to educate the new generation of Newars. It is translated from the Nepal Bhāshā article ' *jhii Newāh gukhatā jui phai* ' (How we become Newars?) from the Mankā Khalah Bulletin(6/01)

नेवार हुनु को सही अर्थ के हो भन्ने बारे खोजि गरेको निकै भयो । साच्चैको नेवार कसलाई मान्ने हो त ? नामको पछडी जोडिने थरको आधारमा मात्र हामी आफैलाई नेवार घोषित गर्न सकिन्छ र ? नेवारको सही अर्थको खोजी गर्ने म मात्रै हो कि अरू पनि छन् ? जीवनको उत्तरार्धमा देखापर्ने समस्याहरूले गर्दा मलाई यी प्रश्नहरू प्रस्तुत गर्न मन लागेको हो की ? हुन त नेवार जातीको संस्कृति र सम्पदाबारे मलाई उति ज्ञान छैन । म नेवार जातीको महर्जन परिवारमा जन्मेको भएता पनि मेरा बुवा मुमाहरूले आफ्नो जातीय भाषा बोल्नु हुन्न । किनभने वहाँहरू दुवै राणाहरूको दरवारमा जन्मेर हुर्केका थिए ।

वास्तवमा भन्ने हो भने मैले नेवार संस्कृतिको ज्ञान अमेरिकामा रहँदा सिकें । हुनत मैले पाटनको एउटा माध्यमिक विद्यालयमा अध्ययन गर्दा नेवार भाषाको एउटा कोर्स पनि लिएको थिएँ । तर त्यस अध्ययनको जग भने ममा गाडीएन । किनभने मेरा अधिकांश मित्रहरू पक्कै खलकका थिए । आज मेरा बाल-बच्चाहरू हुर्केको र बढेको देखेर म नेवार जातीको सही अर्थ खोज्ने तरखरमा छु । नेवार जातीको सांस्कृतिक सम्पदा उनीहरूलाई पनि सिकाई राख्ने मेरो ठूलो आभिलाषा रहन गयो । आफु सानो छँदा आफ्नै टोलमा खेल्दा खेल्दै सिकेका नेवार संस्कृतिका कतिपय पक्ष अहिले पनि आलै रहेको महसुस हुन्छ । बिसुद्ध ज्यापुहरूको टोलमा 'च्याम्पति' खेलेरै नेवार संस्कृतिका मर्म र महत्त्व बुझेको अहिले पनि झल झली सम्झना आउँछ । मानिसको मानसिक विकासमा बाल्यकाल अत्यन्त महत्वपूर्ण अवस्था मानिन्छ । हामी हुर्केर बढ्दै जाने क्रममा बाल्यकालका घटनाहरूसँग जोडेर रमाउने स्वभाव हामीमा रहेको देखिन्छ । मलाई धन्य पुणिमा (यःमरि पुन्ही) को दिनको रमझम अझै राम्ररी सम्झना छ । त्यसदिन छर छिमेकीहरूले माया गरी बोलाई बोलाई 'यमरी, चटांमरी' आदि ख्वाउँथे ।

आजकल हामी विश्वको सामुहिक समाजमा बाँचिरहेका छौं । हामी संगसंगै संसारका अनेकौ सामाजिक व सांस्कृतिक सम्पदाहरू पनि बचाउने कोशिशमा तल्लीन छौं । यी बिभिन्न कसिमका मूल्य र मान्यताहरू हाम्रो जीवनसित घुलमिल भैरहेको परिणाम स्वरुप मैले आफ्नो नेवार जातिको सांस्कृतिक महत्त्व तिव्र गतिमा विर्सको अनुभव गरिरहेको छु । अब त यो संसार नै एउटा सानो समुदायमा परिणत भएको महसुस हुन्छ । हाम्रा टोल टोलका पुराना मन्दिर र बहालहरू सबै हिड्दुल गर्न हुने सार्वजनिक बाटो कायम भैसकेको छ । काठमाडौंका मित्रवर्गले आफ्नो पुरानो घर भत्काएर नयाँ बनाउंदा पुरानो परम्पराको आंखे झ्याल (तिकि झ्याः) राख्ने नगरेको देखिन्छ । अधिकांश नेवार आईमाईहरूले 'हाकु पर्सी' नलगाउने गरेको देखिन्छ । काठमाडौंका धेरैजसो मित्रहरू हामी अमेरिकामा बस्नेहरूभन्दा बढी नै पछिमी समाजद्वारा प्रभावित भैसकेका छन् ।

हालसालै म नेपाल भ्रमणमा जाँदा पुरानो परम्परानुसार भोज खान पाउंला भन्ने आसा गरेको थिएँ तर जतातै पेप्सी कोला, बियर अनि बफे स्टाइलका डिनरहरू स्विकार गर्न कर लाग्यो । नेवारहरूको थल थले (तखाःला), भुटन (पुकाला) र सित्राको धूलो मिसाएको सन्याखुना देख्नै गाह्रो भयो । आफ्नो भाषाका कवि र साहित्यकारहरूबारे जानकारी लिन चाहँदा केहि भेट्टाउन सकिएन । मलाई थाहा थियो नेवारहरू नेपालको रजधानीका आदिवासी मात्र होईन अत्यन्त शिक्षीत जाती पनि हुन । बहुमूल्य प्रतिभा युक्त जाती भएर पनि आफ्नो सांस्कृतिक महत्त्व र मान्यताहरू गुमाउनु परिरहेको छ । हामीले हाम्रो संस्कृति र संस्कारबारे छलफल गरेर यसको महत्त्व बुझ्न सक्नुपर्छ । नयाँ पिढीया हाम्रा युवा युवतीहरूलाई हाम्रो संस्कृतिबारे जानकारी दिलाउनु पर्छ । आ-आफ्नो शीप अनुसारको कलाकारहरूले यसलाई जोगाई राख्न विशेष भूमिका निभाउनु पर्छ ।

हामी वरपरका जातीलाई निहालेर हेर्दा पनि उनिहरुले आफ्नो सांस्कृतिक परम्परालाई समेटेर जोगाई राखेको देख्छौ । उनिहरुले आफ्नो भाषा, संस्कृति र परम्पराको बिकास पनि गरिरहेका छन् । तर हामी चाहि यस क्षेत्रमा पछि परेको महसुस हुन्छ । हाम्रो सामु यस्ता पनि पुरुषार्थ ब्यक्तीहरु छन् जस्तै आफ्नो भाषालाई तिताञ्जली दिइ सकेकाहरुलाई उपहासको पात्र बनाएर भाषा सेवामा लाग्ने गर्छन् । हुन त हाम्रो निम्ती भाषा सिक्ने अवसर पनि जुटिएन । किनभने हाम्रो शैक्षिक व्यवस्थाले यो सुबिधा दिईएको छैन । हामीमध्ये धेरै जसोले आफ्नो भाषा मुस्किलले लेख्न र पढ्न जानेका छन् । त्यसैले हाम्रा अधिकांश सांस्कृतिक परम्पराहरु मौखिक रुपमा मात्र हस्तान्तरण गर्दै आएका छौ । यदि हामीले हाम्रो संस्कृति आधुनिक युगमा जोगाई राख्ने हो भने हामी अमुक भएर हेरिरहने मात्र होईन कि यसलाई व्यवहारमा प्रयोग पनि गर्दै जानुपर्छ । यदी हामिले आफ्नो भाषा जानेन भने हामी नेवार भएर बांचेका छौ भनी कसरी दाबी गर्ने ?

जब म सचेत हुंदै गएँ मैले मेरा बालबच्चाहरूलाई आफ्नो संस्कृतिबारे सिकाउनु पर्ने बाध्यता देखापर्दै आए । अनि मलाई महसुस हुंदै आयो कि हामीमाझ एउटा संस्थाको अत्यन्त आवश्यक छ । आफ्नो संस्कृतिको हस्तान्तरण गर्ने बुद्धिजिवी हरुको पनि हाम्रो समाजमा आवश्यक छ । यस काममा मैले नेपाः पासो पुचः मार्फत सक्दो सहयोग पुऱ्याउंदै आएको छु । नेवार हुनुको नाताले आफ्ना बाल बच्चाहरूलाई पनि आफ्नो संस्कृति सिकाई राख्ने मेरो ठूलो आभिलाषा रहेको छ ।

मलाई एउटा कुरो को के गर्व लाग्छ भने यदि हामी नेवार भएर बाँच्ने हो भने हामीले आफैलाई सम्मान गर्न जान्नु पर्छ अनि अरुको पनि सम्मान गर्न जानिन्छ । हामीले हाम्रो परिचय र संस्कृति संरक्षण गर्ने हो भने निम्न लिखित कुराहरुमा ध्यान दिनु अति आवश्यक छ :-

१. आफ्ना बाल बच्चाहरु लाई आफ्नो जातीय भाषा र संस्कृतिबारे ज्ञान दिलाउनु अत्यन्त आवश्यक छ ।
२. आफ्ना सांस्कृतिक संस्कारहरु जस्तै म्हा पुजा, जंघा, इही, बाग्य राख्ने आदी निरन्तर रुपमा अपनाउनु पर्छ ।
३. आफ्ना सन्तानलाई हाम्रो चाड पर्व बारे सुनाई राख्नु पर्छ ।
४. काठमाडौंका बिभिन्न संघ संस्थासित सम्बन्ध राखेर नयां नयां खबरहरुको आदान प्रदान गरिरहनु पर्छ ।
५. बुढा पाकाहरुबाट हाम्रा बालबच्चाहरुलाई बेला बेलामा सांस्कृतिक सम्पदाबारे सुनाई राख्न पर्छ र तिनिहरुले पनि अरुलाई सुनाउने बानी बसाल्नु पर्छ ।

अमेरिकाका नेपाः पासो पुचः यस क्षेत्रमा नयाँ ढाःचामा काम गर्न इच्छुक छ । हाम्रा बालबच्चाहरुको निम्ती प्रोत्साहन दिन लेख प्रतियोगिता गर्नु पर्ने विचार छ । 'आशा छ यस कार्यक्रमबाट आपसमा सहयोग हुन सक्छ ।

यहां मलाई एउटा कुरो को के महसुस भई रहेको छ भने नेवार भाषा जानेर मात्रै नेवार हुने होईन । आफ्नो संस्कृति, संस्कार, परम्परा, मूल्य, मान्यता, दर्शन आदी कुराबारे ज्ञान हुनु अत्यन्त जरूरी छ । यी कुराहरुको कमी भएमा नेवार हो भनी महसुस नहुनु स्वाभाविक हो जस्तो लाग्छ ।

कान्छा विभूति शंखधरको पहिलो प्रतिमा

(साभार: कान्तिपुर दैनिक नोभेम्बर १५, २००१)

नेपाल संबतका प्रवर्तक राष्ट्रिय विभूति शंखधर साख्वा:को पहिलो प्रतिमा निर्माण कार्य सकिएको छ । मध्यपुर ठिमी नगरपालिकाको पहलमा निर्मित प्रतिमा नयां वर्ष नेपाल संबतको ११२२को उपलक्षमा प्रधान मन्त्रीद्वारा अनावरण गरिने कार्यक्रम छ ।

सरकारले शंखधर साख्वा:लाई २०५६ मँसीर २ गते राष्ट्रिय विभूति घोषणा गरेपछि नगरपालिकाले नयां ठिमिलाई शंखधर साख्वा:चोक नामाकरण गरी उनको प्रतिमा निर्माण गर्ने निर्णय गरेको हो ।

प्रतिमा निर्माण समितिका अध्यक्ष श्यामकृष्ण मानन्धरका अनुसार त्यसका लागि हालसम्म पाँचलाख भन्दा बढी रकम खर्च भइसकेको छ । नगरपालिका र 'ल्याय्म्ह पुच: थिमि'को सक्रियतामा निर्मित प्रतिमा निर्माणमा जनक शिक्षा सामग्री केन्द्र लिमिटेड लगायत विभिन्न संघ संस्था र स्थानीय ब्यक्तिले सहयोग गरेका छन् ।

अरनिको राजमार्गको उत्तरतिर अवस्थित प्रतिमा २४ फिट लम्बाई र २० फिट चौडाई क्षेत्रफलभित्र छ । उक्त क्षेत्रबीच १२ फिट उचाईमा राष्ट्रिय विभूति

साख्वा:को पुर्णकदको बुध्दासन प्रस्तर प्रतिमा छ । उक्त प्रतिमा मुर्तिकार धर्मरत्न शाक्यद्वारा कुदिएको हो । नेपाल सम्बत नेपालमै स्थापित दोश्रो संबत भएको बताउंदै इतिहासकार भुवनलाल प्रधान भन्नु हुन्छ- 'यो संबतको शुरुवात साधारण नेपाली शंखधरले गरेको सार्वजनिक ऋण मोचनका कारणबाट भएको हो । यसको नामाकरण कुनै राजा वा कुनै व्यक्तीबाट नभइ देश कै नाउं बाट गरिएको हुंदा यो संबत नेपाली संस्कृतिको अभिन्न अङ्ग हो ।

इतिहासकार प्रधानका अनुसार भाषा वंशावलीमा शंखधर प्राचीन पूर्णावती नगरका एक ज्यापु भएको उल्लेख छ । शंखधर एक धार्मिक, उदार, परोपकारी ब्यक्ती थिए । यिनको निधन उनैले चलाएको नेपाल संबत १०सालमा भएको थियो ।

इतिहासकार प्रधानद्वारा लिखित लेखका आधारमा शंखधरले पशुपतिनाथ स्थान वरिपरि आफैले राखेको दुंगे मुर्तिको चर्चाबाट 'ल्याय्म्ह पुच:थिमिले १६ वर्ष अघि खोजि नीति गरी तस्बीर सहित नेपाल संबत ११०८को भित्तेपात्रो प्रकाशित गरिएको थियो ।
